I'm interested in the 30L1, but I'd fly to pick it up in person...Cash!
If you are within 80-1200 miles of central Michigan.

The only way I purchase these kinds of items on the net is to see them and
pay cash in person.

I do not in any way shape of form buy though e-bay.

Hi all,

I have a Mirage D15 440 amp. This unit has developed a short and I do not have the manual. I bought it used . I need a schematic for this unit so maybe I can try to repair it. Anyone have one?

Thanks

Barry

I have an interest in good filters, but I cannot find those
numbers on the Rowckwell Filter page:

http://www.collins.rockwell.com/otherbusinesses/collins-filters/products/

I have an OLD Collins filter catalog which lists them, but there are several versions of each. There are none ending in 000, however if they end in 00 then they should be 2.7kHz at 3dB long type Y. The catalog I found them in uses kc instead of kHz so you can guess how old it is!

Long type Y are 7/16" dia. and 2 1/2" long not including three solder tabs on each end.

If they don't end in 00 then there are various bandwidths and case styles but I only have data for 011, 021, 031 and 041.

Hope this helps.

I have a retail, non-upgrade, full version legal copy of office 2000
premium. I would like to trade it for a nice shortwave radio.

E-mail me with what you have and I will consider all offers before
making a decision.

This is the package that contains Excel, Word, Powerpoint, Frontpage,
Access, publisher and Photodraw !

Here is a link that shows the internet price of $680 and an overview of
the program

I am selling off my operating spares, first being a Mackay 3031A in nice
shape. Radio is noted for being especially hot on AM.  Its at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=351486282

Thank you for your interest.

Kenwood TS-850SAT for sale.
```

It is in excellent condition both physically and electrically.
50 mil. serial number.
Clean in every way and works great. No scratch or ding.
It comes with MC-60 desk microphone but no hand mic, boxes, or filters.
It also comes with original manual.
Reason for selling is that I decided to stick with older radios that I
have and I don't use it much these days due to family matter.
Price is $825 (in USD) plus actual shipping cost by UPS (around $35 for
most locations).

Christopher VA3UT

Hi all;

I'm looking for a good condition Ten-Tec mode 405 amplifier. Must be operational, non-smoker. VG to E physical condition too, manual would be a plus.

Please email to NeilR@innermedia.com

or you can call me toll free at (800) 962-2949

Thanks!

Neil, N1DMA

Hello Everyone,

I am looking for QST magazines -- in decent shape -- from *at

the latest* the 1970's for a collection. I'm especially interested in
any issues prior to the 70's!

If you are looking to get rid of your box of QST's, I'll be
happy to reimburse for shipping and/or a reasonable cost for the
magazines.

Please email direct. Thanks!

73,
Brian, N5ZGT

Hi all;

Looking for both/either Drake MS-4 Speaker and Drake AC-4 power
supply.

Power supply must be operational, cosmetics not very important.

Speaker must have proper Drake decal on front, and not be dented.
Otherwise I'm flexible.

Please contact:

Neil, N1DMA
NeilR@innermedia.com

or call toll free: 800-962-2949

Thanks!!!

Received this HT on a trade.   Condition is very good(almost like new).

Works very well. Able to hit most of our local repeaters with the ducky w/o problems.
reports of good audio.

Shipped to you (CONUS) $150.

Works with several radios including the AOR AR8000 scanner that uses a
special ribbon cable connection.

This is a great scanner and general coverage radio.
It receives continuos coverage from 100 Khz to 2 Ghz (including cell bands).
It is in need of a minor repair. The crystal needs to be resoldiered to the circuit board.
I could do it myself. But, I am too afraid that I will ruin it.
I have software for it to work with a Mac.

Received this HT on a trade.   Condition is very good(almost like new).

Works very well. Able to hit most of our local repeaters with the ducky w/o problems.
reports of good audio.

Shipped to you (CONUS) $150.

 Yaesu FT-2200 2 meter transceiver with extra power cable, excellent condition
(if a 10 is new, this unit is a 9.5). Boxes, manuals and auto mounting bracket
is included. Unit has extended receive (140-175 mhz.) and transmits 50/25/5
watts output. I will include a Phase III AC power supply (13.8 volts at 12
amps). You pay shipping.  Price $150. EMAIL if interested.

I have a yaezu ft-101ex that I would like to sell or trade. Radio recieves
well, transmit is low, could be tubes could be something else. I just want a
backup radio and I don't want to put money in to it. MMake me an offer, I
will considder trade with cash if you would like, just something for a

backup radio, a ts130 or something, even a 2950 if the deal is right. Email n1umj@mediaone if you might be interested. The radio is a backup and I don't want to put any money in to a backup radio especially where my main radio is so reliable, I just want a backup just incase. thanks,

I received in a trade a HW-16. I have no idea if the CW Transmitter is
working or not - I have not hooked it up at all. I do have the manual to go
with the transmitter. If your interested the transmitter is sold AS-IS. And
buyer pays for shipping.
Price is $85.00 + Shipping. Transmitter is in excellent cosmetic condition.

Email if interested.

Well this is all that remains and it ALL has to go, so drop me a line if the price seems out of line. I'll even through in the shipping and insurance state side if the offer is good :)

Radio Shack HTX-212   2m mobile   I give it a 7 as there are some minor surface scratches on the case. $125 obo

TrippLite PR-12 power supply, mint, very nice unit. $60 obo

MFJ-407C Deluxe Electronic Keyer, mint, bought but never got around to going for the code test. $50 obo

Bencher BY-1 paddles, same story as keyer $50 obo

Cobra 2000 GTL w/ extra speaker. With original box and mic. Also has D104 deskmike. Yes it does have the extra freqs and clarifier mod. $250 obo

It's time for me to upgrade the computers in my ham shack from 486 to pentium so I'm looking for several motherboards with CPUs and optionally, memory.

This is what I'd like:

well known boards like ASUS or others.
P166 or better chip
On board I/O including FDC/HDC, Serial and parallel, USB, IR connector that is IRDA compliant.
ISA/PCI slots min of three each. (alternately, all PCI slots)
Must have the manuals for the board or be avallible on-line.

Board style may be AT or ATX.

I don't want boards with on-board video or sound cards. SCSI controllers are ok, as is on-board ethernet.

Also, I would consider purchasing other components such as hard drives, video and sound cards, and memory on an individual basis.

I would prefer to pay cash for such items but do have some items to trade. Mostly, they are components- trimmer caps, twinax-coax, misc other items.

Please e-mail me with the manufacturer and the model number of the board, the CPU manufacturer, model and speed. Include an asking price.

e-mail ghopper@eskimo.com

Grant

Good condition, never mobile. Has all original accessories including
box, manual, schematics, etc... On a scale of 1 -10 this radio is at
least a 9. Need to move it, ran out of room and moving to a new place.
Will sell for $300 plus shipping.

Thanks

For sale a near perfect Kenwood TS450-SAT with antenna tuner and 500 khz. cw filter. The unit includes all boxes and manuals.
Also included is a Pyramid 30 amp AC power supply, MFJ 407b keyer and homemade squeeze key and MFJ 1704 coax switch. All manuals or data sheets included with this equipment.
The Kenwood has never been mobile and I am not a smoker. If a 10 is new and still in the box, this unit is a 9.5.
I will not break up this equipment. Price is $800 and you pay shipping.

Hi folks, please excuse the bandwidth. Need to hear from Gil. I sent him a check a month ago which hasn't yet cleared, and I'm trying to close the account and don't want him to suffer a bounced check charge. I get no response from his email address as listed on QRZ (gbishop@home.com).

If anyone can bring me up to date on his activities, I'd appreciate it. Perhaps he's on vacation.

GOOD! Ham radio is nothing more than a cheap-ass old white
males hobby anyway in the USA. I just freakin love it when
I see full-page AD's dissappear from ham mags. Let all the
dealers go freakin out of business. Ham radios are built no
different from cheapo VCR's anyway. Anyone who would pay
more than $300 for ANY new piece of ham gear should have his
head examined. So keep droppin like flies you old tightwad
farts. I wanna see page-and-a-half long Obit's in QST.

Is a catillion a party for felines? I never heard of it before your posting. I think you mean cotillion or in plain words, a fancy dance party and how that relates to a hamfest is beyond me unless that city is known for it's swanky swingers and humdingers.

Doc is right.

At least I didn't type it out as Castillian, as some on here with

advanced degrees in ham radio (now possible under the ARRL CEU program)
would have.

Hi all.

Just a reminder, there's just one day left on the ebay auction for a
very special Drake R4-C.  This unit is an interesting collectors item,
having been an in-house engineering prototype at Drake.

Check it out at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=305449161

Thank you, and happy bidding.

Neil

I have one of the type M67712 class AB 30 Watts out average, 40 Watts
max. The input drive is 300 mW. I am asking $ 60.00 including shipping
each for them. RF
parts wants around $80.00 for the same.

These are brand new never been used and still have the one inch leads on them.

Thank You,

Bryan Fields, KB9MCI

I have several Collins 208U-3 3 KW 2-30Mhz RF Amplifiers. These are in
good condition
as removed from military service.

This is a military/commercial quality amplifier that uses a single
4CX3000A to produce
3 KW PEP or average power with only 0.2 watts of input.

These are automatically tuned with a servo system that takes about 10 seconds to tuneup.

The primary power input is 200-250VAC, 3Ph, 47-60Hz.

The net weight is 975Lbs, size: 32" x 23" x 70" Tall.

If you have 3Ph power and the room one of these superb Amplifiers would make a great addition to your station.

I am offering these unpacked FOB Somis, CA as follows:

untested less the 4CX3000A Tube $3,000. unpacked.

I have a few NEW Guaranteed 4CX3000A tubes at $1,000. each

Crating by a professional packer is $350.00 additional.

A complete service manual is included at no charge.

There is a photo of this item on our web site
http://www.columbiaelectronics.com

If you need more info please contact me.

Check with Antique Electronic Supply in Tempe Arizona. If no luck there we
can get you some.

I need a used/dead/discharged battery in the BP82 series to fit an IC-2SAT, or even better, a BA11 bottom cap. If you have any or all of these items that you would be willing to sell, please email me.

Thanks in advance,
Erik Hoover

I purchased a CD-ROM covering all 9 volumes of Police Call, 1999 1st
edition from Grove Electronics in Feb. 2000 for $34.95 US.

I cannot get the CD to install properly and have had virtually NO
support from  "Pozilla Software" who is the writer of this data base.

I have made countless calls from Feb. to present with unreturned calls.

So much for their help line and customer care.  It is none existent.

Think twice before you throw your money away on this product.

So far it sits gathering dust, totally useless to me.  It does NOT
function!

Pozilla Software has a great "I don't care about the customer" attitude.

Instead of using this as a forum to blast Pozilla, why not try and be a
bit more construtive?  Personally, I realize this is a relatively immature
(in other words "new") product and I would  expect a few bugs. (Anyone
remember products such as Windows 3.0, WordPerfect 6.0, etc.)

Try to explain the problem you are having with the product and see if
someone here may be able to help out. Otherwise, quit griping and enjoy
your new paperweight.

http://www.strongsignals.net/pastnews.htm

April 16

I just received the following from Melissa Goldman, wife of Adam Goldman, President of Pozilla Software:

Adam wanted me to send you an e-mail. He was hospitalized last Monday with a collapsed lung and the office has been temporarily closed. While the doctors have released him from the hospital, he has been ordered to bed rest for a couple of weeks. In the interim, the office is closed. If you could release a statement that the office is closed and why it is closed, that would be very appreciated. Please let people know that e-mail will be answered at least once a day until his health improves. I am doing the best I can to keep things running like now, but since I do not have the extensive knowledge of scanners and the software that my husband has, I am very limited on what I can reply to. Please assure everyone that Pozilla is still around and we will do our best to facilitate our customers.

I'm sure I speak for all of us in the scanner community when I offer our heartfelt wishes for a fast recovery, Adam! Take care of yourself and we'll be here, waiting patiently, when the time comes for you to climb back in the saddle!

Congratulations to Tony Gargano for taking delivery of a Japanese version of the Icom IC-R3! Perhaps he will be kind enough to share his thoughts on the radio with us over the next, few days. That is if he can pick up on the manual written in Japanese! ;-)

And yes, today was the day that Strong Signals reached the 1,000,000 hit mark! I want to thank all of you who have helped make this THE place to be on the Internet when it comes to radio monitoring! We have all done a lot to help each other where we can, and I think the results speak for themself. Thanks for all your support, and long live the monitoring hobby!

Call your credit card company and have them remove the charge and get your money back for you. The merchants are bound for 6 months after a sale by contract that the credit card issuer can take back thier money right out of the merchants bank account.

Since you can't get any use out of the disk, your liability for paying for the merchandice would theoreticly be the value of the plastic and the cardboard of the disk and box.

Stick it to them, and get your money back the hard way, and thenlet them all go pound sand!

Excellent condition TS-700A 2mtr all mode rig. All solid state. Complete with original hand mic and original service manual (all schematics and parts lists), including update bulletins. Radio has 2 crystals added for .12 and .52 in the fixed positions (9 more open). Have operated in all modes and radio works perfectly. This model also has AM mode.

Sell for $300 or would consider trades for dual band mobiles such as DR610 or FT8100/8500. Would also consider trade for Kodak DC-120 digital camera.

.amateur.misc,rec.radio.amateur.swap

I've got 1/2 of a Drake C-line, and need an R4-C and MS-4 to finish it
up.  The details:

R4-C: Must be 5-position mode switch.  I don't care if it has Sherwood
or other mods, but must not be butchered.  Filters and crystals a
plus, but not required.  Most important is that it be cosmetically
very good, and with a minimum of corrosion on the chassis.  Also must
be complete, no missing parts please.

MS-4: Condition not that important, except must not be dented.  Also,
```

must have normal Drake MS-4 label in the front, and speaker must be ok. I don't need a power supply.

Please respond with price and condition to NeilR@innermedia.com, or you can call me at (603) 465-2788, or (yes toll-free) 800-962-2949

Thanks, and best 73's all.

Neil, N1DMA

The very latest model of the 300 watt Versa Tuner from MFJ. Custom
finish on cover. Not a blemish on this terrific looking little tuner.
with instructions for only 65.00 shipped CONUS.

I need a manual for a new Cubic R3030 rig I bought. Will pay your price.
Or can copy some kind souls original and will pay for it.
Much appreciated.

I have a Raytrack DX2000L rf deck that is missing some parts. I'm looking for a partial rf deck and/or a power supply for this unit. Please reply directly with what you have.

Thanks,

Bobo

For sale amateur radio equipment:

Kenwood TS-450sat in pristine condition. Includes 500khz CW filter. This unit was little used (2 QSOs in all of 1999, 3 in 1998 and only 1 in 1997, none in 2000) and has never been mobile. All boxes and manuals are included.

Pyramid 30amp AC power supply for the Kenwood. Manual included.

MFJ 407b keyer and homemade 'squeeze' key. Manual included for the keyer.

MFJ 1704 coax switch. Manual included.

I will NOT split up this package. Asking $800 for all and you pay shipping. Pickup in north Cincinnati area, just 50 miles south of Dayton hamvention. This is the most perfect ham rig I've had in almost 40 years, but the interest has left me. So I think it's time to part with it. EMAIL if interested.

Yaesu FT-5100 VHF/UHF Mobile

Excellent dual band rig. Original owner. Condition 8 of 10 (band switch lettering is rubbing off, some slight scuff marks on top). High power (50w on 146 MHz, 35w on 440 MHz). 80+ memory channels in two banks per band. Full crossband repeat capability. Dual in-band receive (V, U), Built in duplexer. Box, manual, TT microphone.

AES and HRO price used at $350, aade lists ebay prices at average of $290, high of $350, AF4K lists one transaction at $400. I'm asking $275 plus shipping.

Reply to <my callsign> @ arrl.net or <my callsign> @ midsouth.rr.com via e-mail for quicker response.

Very late production model s/n (001xxxx), mfg. Jan 1988. Two brand new Inrad CW filters (400Hz) one for each IF stage ($250 value). IF-10B computer interface installed and W1GEE computer interface cable included ($125 value). Built-in antenna tuner option installed. Excellent condition (9 of 10), original manual. Reason for sale: already have two other HF rigs, this one takes up more space than I can allow (but is by far the best performing rig I own!)

US$1,100 plus shipping.

Email to <my callsign> at arrl.net or <my callsign> @ midsouth.rr.com for quicker response.

Delivery within 250 miles of Memphis, Tennessee, can be arranged.

Thanks,
Marty N5NW

My WSHFAX floppy died. Does anyone have a copy that they would email me?

I have tried reaching the author with no response.

Thanks,

Bob

Actually, less. If I remember correctly, when the FCC moved to 40
channels, the tightened the spec for type acceptance. 23 channel radios
could be continued to be used by their current owner but no-longer could
be sold, new OR used. This was force method to phase the older radios
out of existence. But we know how enforcement goes.

For sale amateur radio equipment:

Kenwood TS-450sat in pristine condition. Includes 500khz CW filter. This unit was little used (2 QSOs in all of 1999, 3 in 1998 and only 1 in 1997, none in 2000) and has never been mobile. All boxes and manuals are included.

Pyramid 30amp AC power supply for the Kenwood. Manual included.

MFJ 407b keyer and homemade 'squeeze' key. Manual included for the keyer.

MFJ 1704 coax switch. Manual included.

I will NOT split up this package. Asking $800 for all and you pay shipping. Pickup in north Cincinnati area, just 50 miles south of Dayton hamvention. This is the most perfect ham rig I've had in almost 40 years, but the interest has left me. So I think it's time to part with it. EMAIL if interested.

You guys that are auctioning stuff, if you're going to auction it then AUCTION it! If you want to list it here, then list it here! If we want to go to ebay, then we will go to Ebay!! The auction often suckers hams and others into buying for almost and sometimes the same price as new which I think is unethical!! The almighty dollar strikes again!! I for one am tired of people puting auction stuff on here!! Anyone else have an opinion??? I thiunk the sysops here should ban this now. Dan L.

I have an opinion -- lighten up! I like to see what is available and it
seems reasonable for people to announce items they are auctioning here to
let hams know what is available. Ebay is a huge market, and, like it or
not, is setting the price for used gear. The newsgroup ad you responded to
says FA -- you don't have to read it if you aren't interested in auctions.

I generally agree -- except with the last statement.  I've been
watching e-bay auctions (admittedly not for long) but it seems that few
of the auctions actually result in a transaction, because the reserve
prices are not being met.  In those cases, I'm not sure you can
accurately say that e-bay is setting the price.

It used to be that people only acquired equipment they desired to use,
or perhaps the gear that was collected (like collins, or heath, etc.).
Now we have a jillion different used equipment brokers who look to buy
low and sell high.

Why, I remember the days not too terribly long ago when an elmer might
actually give someone a rig to get them started.

In a non-scientific study I made over a period of about 2 weeks less than 4 percent of reserve auctions in the "Ham" catagory did not make reserve. The total reserve price items I monitored was 407 (most were 7 day auctions). 392 made reserve. of the 15 that didn't 5 were canceled before the auction ended. That leaves ten items that had a chance of meeting reserve and didn't.

I did a secondary study (first to admit non-scientific) on shortwave receivers that were in that 407 items. I compared the final ebay price to Fred Osterman's price guide (all editions, including the early editions that had portables in them). I compared a total of 100 ebay receivers to Osterman's prices. Since Osterman gives a "low" and a "high" used price I used the half way price between those two extremes as a comparison. I was surprised to find that over 80 percent of the receivers sold for less than Osterman's suggested value! The one's that did sell for more than Osterman's price usually went for only $20 to $40 more than the middle price. 8 items went for more than the highest Osterman price. Some of those 8 had options that raised the value of the receiver.

And now for the clincher! I go to a lot of ham fests. I kept track of some of the prices I saw at ham fest on certain receivers. (R-71A, Kenwood R-5000, R-2000, R-1000 & any JRC or Drake. Almost all the receivers were priced higher at ham fests than they finaled for on ebay! One exception was the R-2000 which was always cheaper at the fest than on ebay. The one or two JRCs I saw at fests were usually several hundred dollars more than ebays final prices. The same was true of the R71A and R-5000.

But you have to remember several things when reading my numbers. (1) the fests prices were the starting price posted on the radio....usually you can talk it down. (2) ebay radios have postage and insurance you have to add. (3) you can "see" the product at hamfest.

I was shocked to see that in the end ebay was usually the best buy compared to a hamfest!

Since I was looking for some Timewave and JPS filters at the time I paid attention to those also. Believe me, if you
need a timewave or JPS DSP filter buy it on ebay.

Of course my study was half hazard and non scientific with no control factors....and it was on items that interest me. It would be interesting to see a "good" study of prices with documentation to back it up.

Looking for a Station master in the 440-450 band. Might consider
something cut close. Need for repeater system.

TIA, Bobo

I have two Collins mech filters P/N 526 9427 000 .

This is the sideband filter from the KWM-2A. It is meant to be used with
456.35 and 453.65 carrier osc xtals to produce USB and LSB from
balanced carrier.

The filters I have are the later, rectangular, plug in style.

#1 is unused

#2 is attached to the KWM-2A bracket and includes
several assoiated parts

also have two USED xtals (with short leads)

make offer.

73

Bill

N5LMX

forsale here first.

ic 706
you get the original hand mic, original manual, original box, original
power cord.  nothing more, nothing less.
non-smoking environment.

was replaced by 706m2g and now i need the money.
ham radio - 4 grade school kids + fixed income = no xtra radios
has had the 'yellow wire' rx mod.

first $500.00 american in money order form gets this fine compact.
u.s. priority mail shipping to conus is included.

I have 2 of the type M67712 class AB 30 Watts out average, 40 Watts max. The input drive is 300 mW. I am asking $ 60.00 each for them. RF parts wants around $80.00 for the same.

These are brand new never been used and still have the one inch leads on them.

Thank You,

Bryan Fields, KB9MCI

I have a kenwood TK-805D 16 channel front panel programmable commercial UHF radio to swap for its VHF brother the TK-705D.

Anyone want to swap Uhf for Vhf?

Gary N8emr

--------------24E9F9758BB26606A7FB5331
Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

This Lot consists of the following slugs: 1. 25-60 MHz 25W (NEW), 2.
50-125 MHz 50W (USED), 3. 100-250
MHz 50W (NEW), & 4. 200-500 MHz 50W (USED). One of the new slugs has the
letters smeared but I assure
you it is new. The two used slugs are in like new condition. These slugs
come with a money back guarantee less
S&H if you are not satisfied with them. I am asking $175 for all four.
This is about half of what I have in them.
These slugs generally run from $80 to $100 new. Buyer pays $4.50 S&H to
anywhere in Continental U.S. and Canada. Shipping will be via 2-3 Day
Priority Mail. Other methods can be arranged if requested. Payment must
be in the form of a money order or certified/cashier's check.
Please email if you are interested or have any questions.
Thanks in advance!!!

James

$550 for a TS530?????!!!????  I'm curious why so much?  I just sold a mint
condition Icom IC-728 all band all mode solid state rig for $465.  Unless
the radio was purchased, then stored unsed for all these years and now being
sold as such, I think your asking about $200 too much for the radio.

(Oh my word !)

Grosse Pointe Woods Hamfest cancelled: Gerald Rosner, N8FGK, has announced that Michigan's Grosse Pointe Woods Hamfest, scheduled for Sunday April 16, and sponsored by SEMARA has been cancelled. The Hamfest Committee made the decision based on a lack of advance table sales and dealer participation. SEMARA apologized for any inconvenience.--George Race, WB8BGY

(Must've conflicted with this year's Grosse Point Spring Catillion. I do hope the Mercedes SUVs are still all abloom though !)

I have a VHF HT-600, 6 channel, 5 watt portable for sale. Has brand new battery and will program to your needs. Unit is 146-162 MHz model but can program entire ham band if necessary. Asking $200 or would consider trade for dual band amateur portable. (DJ580/582, TH79, etc.)

Only an idiot would send money(pre-pay) to a stranger before receiving
merchandise. I've made dozens of purchases and sales over
the internet in the last 6 years without any problems. C.O.D. is the
only way to buy and sell over the internet. I perfer to use U.P.S .For
the buyer the worst that can happen is is that no one will come to

collect your check or money order. You only lose the cost of the
check or money order(99cents?).For the seller the the worst that can
happen is you will be out the shipping and C.O.D. charges.You can
always find someone else to buy or sell to. C.O.D. is safer and losses
are minimal for both parties. Pre-paying is risky at best.

I have done a few sales on the net thru this group, two the persons sent the money in advance with a postal money order and I sent out the items the same day or the next day.

The one time I sent a Item C.O.D. Via UPS the UPS people lost the payment and I had to wait for over a month to get my money I was not real happy about this.

This is my $0.02 worth.

Ken

Yeah, but you did get your money!

With an unscrupulous person the buyer may never get the item. Unfortunate,
but a fact of life these days.

Only an idiot would send equipment to a stranger without payment in advance.
COD is not a bad way to go...but the buyer will pay all COD charges up
front. I believe in both buyer and seller beware.

de K0FL

Yes there are Millions of "idiots" out there happily buying and selling pre-paid via U.S. Mail and UPS etc.

C.O.D. has an inherent risk! The guy swho ends you a couple of BRICKS!

It happens more among CB'ers from what I am told.

You can't tell what's in the box until AFTER the UPS guy leaves!
Then it is too late. You have already paid.

There is ALWAYS some measure of risk on the part of buyers and sellers both.

The best thing is to KNOW YOUR buyer or seller! (as much as possible!)

Rip-offs are rare (as was detailed by one poster on some of the newsgroups recently)

I wonder why you copied this to SO many newsgroups?

Have you been a victim of a pre-paid scam? I bet less than 0.0001% of radio trades fail that way.

I have an old topaz 6VDC (input) transmitter power supply
that would be great for a vintage
car ham installation. It's listed on the for sales page at
the link
http://www.geocities.com/SiliconValley/Monitor/4710/

I have zenith wincharger forsale or trade. Includes, blade(prop), tail section and generator. This is a wind powered generator. Charge a battery. Motor spins freely and it appears to work but could use a good cleaning and general restroation work. A perfect acessory for your pre Rural Electrification radio set or as a general battery charger for the shack or other power generating needs Will sell or trade(full or partial) for one(or more) of the items below.

Photos can be seen at
http://www.infinet.com/~gws/windmotor.jpg
http://www.infinet.com/~gws/windvane.jpg
http://www.infinet.com/~gws/windvane2.jpg
http://www.infinet.com/~gws/windvane3.jpg

Will sell for $350 plus shipping or trade full or partial for any of the following items.

repeater community tone panel
2 meter mobile (needs encode pl)
220mhz mobile (needs encode pl)
SOLAR panels and charge controllers.
scanner with cell coverage
mobile HF rig.
Mobile HF antenna system.
440 ham repeater
radio tower (if with 200miles of central ohio).

Other interesting ham gear
Other interesting alterative power gear
Other interesting computer items.

Well...since no one has figured this out yet, I'll be so bold as to offer a summary.

There is almost no completely safe way to do business over the internet with private parties. You ARE TAKING A CHANCE both buying and selling. That's it. eBay is probably one of the safer ways due to the recording of feedback left by buyers and sellers about each other. I have had no bad deals on eBay, but had a very close call with a newsgroup listed piece of equipment. I almost lost $500.   Bottom line is...if you don't feel comfortable buying or selling on a newsgroup, then don't. But don't get burned either way and post the fact you were suckered into a deal and it's someone else's fault. Own it and get over it.

I have had plenty of bad deals on Ebay! I bought a watch from a guy with a feedback rating of over 300 (that is alot). The watch didn't work properly and looked used when it was supposed to be new. The seller was very uncooperative and actually told me he couldn't do anything about it even though he stated a 1 year guarantee! Ebay was also less than helpful when I contacted them regarding the seller and replied with a form letter suggesting various courses of action. I have purchased tubes on Ebay as well which were represented to be in much better condition then they actually were. How is Ebay safe if they take no action on the buyers behalf? If you get ripped of on the NG there is always the Postmaster and Mail Fraud which they persue quite agressively.

One more point. If you get a COD package, you won't know what's in it until you open it and you can't open it until you pay for it. It could be filled with bricks.

That's why there is such a thing as escrow for major purchases. Perhaps it would be a good idea to start an escrow company for online deals. It would be more expensive but at least there would be a better chance of neither party getting cheated.

I am in need of a motorola MX 300 Permacode tone filter NFN6010A, MAL 8432 FL 141.3hz. I have a few to trade 127.3, 114.8 and 192.8hz. Will even consider whole radio's if the price is right and it has the PL in it.

I am looking for a radio with the tube 3A8 (3A8GT) in its line-up. If you have something you are willing to sell or trade, please send me email.

If you don't have one, but know a model name, please let me know.

Thanks,

Steve.

I don't need a mounting bracket, and I can figure it out without the manual. I use Plantronics headsets for mikes on my gear. Thus, I only need the radio itself. Email the address to send you a check for the UPS charges.

I have an old Realistic TRC-X23 CB that reminds me of the Courier 23
that I had when I was a kid, in fact I'm sure it is the same radio. Only
problem is someone removed the accessory plug and no power cord. I need
the Sams CB-15 book or a copy of the schematic.  If you have access to
such,  I am willing to pay for the book or copies, and would be most
grateful!

Thanks,
Fred, N7FK

Had this preoblem also. sign the money order with his name
then sign your name below his. Then put "for deposit only",
"prior endorsements guaranteed" and deposit in your account.

Some here will tell you this is forgery. Your intent is to recover
your money. it was always yours and by leaving a "paper trail"
you have shown NO intent to defraud.

NOT advice. but it works.

My opinion

Did you have the receipt? Without the receipt, should the bank give the
money to just anybody that brings the money order in?

>Why does the bank in question refuse to cancel a normal transaction
>and return his money?

I'm sure they will return the monry to the purchaser with a receipt.

>Perhaps a letter to the appropriate state bank

Why would you assume that the bank has a state charter and not a national
charter?

If your name is not on the money order, don't even waste time trying to cash it without a receipt. Instead, write "for deposit only" on the back and deposit it in your checking account. It may take a few days to clear, but at least you'll have your money.

In the future, use Post Office money orders. There is a place on these money orders for both the sender's and receiver's name. If it is returned, the sender can also cash it.

I, on the other hand, have been burned by dishonest individuals selling stuff. Because of that, I will not do business with a person that will only ship after receiving money up front (money order, or whatever). In fact, I'm very wary of any individual that flatly refuses to ship COD.

You're the seller, Piero. You're the one that wants money. Therefore, in my book, you're the one who has to take the risks. If given a cloice between sending you money up front, or buying a product elsewhere for more, I'll shop elsewhere everytime.

Besides, why would I want to send money to a total stranger? When I buy from an established company, there is something more substantial on the other end. You're just some guy sitting in front of a computer. You would have to prove to me that you were honest before I would send you money up front (finance records, references, and/or anything else a real business would have). Even with a regular business there is no guarantee that the transaction will go smoothly, but it has a far better chance than it does when dealing with an individual.

Unless you do a lot of business, the situations you describe above are very rare. I've done business with UPS and FedEx for years and have only had problems a couple of times (usually circumstances other than a straight transaction involved).

You're claim that a person can file a "fraud complaint with the Postal Inspectors" really would make me nervious dealing with you. If you know as much as you suggest, than you should know that no investigation is launched unless large amounts of money are involved or a history of complaints exist. Therefore, to hide behind this to justify your business practice of accepting only money up front, when you know that nothing will be done if the person complains about you (assuming you did rip someone off), clearly suggests to me that I would not want to do business with you.

You don't need a receipt to get a refund on a Money Order.

always have the money orders made out with the buyers name and your own..
as Pay to "James Kilowatt" or "Cindy Hoo".. that way if you get it back then
there isnt a problem.

The only thing you need to do is write "Not used for purpose intended" on the back of the money order and sign it. They will refund. They keep a record of who bought it. I know, I'm in the banking business and that is how it would be handled with us.

Also, I would consider myself lucky that this individual, while a bit confused, was honest enough to return the money order. I would be disappointed that I didn't get the TNC, but again, you didn't loose your money.

KH

Alrighty then I have all but the radio due to theft.
I'll trade you my brackets and boxes for $200.

You may ship the radio to me.

Cann we say truth in advertising.

Yes you did get my attention!

But why spend $200 for a used 10m radio? You can
spend $249.95 at AES and get a brand new dual band
RCI 2950DX which covers the 10 & 12 meter bands.

FOR SALE

RCA BTA 1R1 1 KW broadcast transmitter. Operational. Tuned to the top portion of the broadcast band. Excellent (large) candidate for 160 or 75. This unit is in good condition for its age. (1960 ish) Scratches on cabinet and a few switches need new paddles. Needs 208-240 VAC single phase.

You will need a pickup for this baby. 1300 lbs, however the transformers are removed for ease of moving. Easy to load.

I would not be selling this except I can't afford to move it across the country. Estimates at $500.

Unit is in Toronto. You must pick up. Can not deliver.

$750 US or trade for ????? other ham gear. Old or new.

email me directly for pictures and for any questions.

The links in the last message MAY have been broken, these should work...

Please forward to EVERYONE on your mailing list!!!

Some of you will not reconize my e-mail address, I have several, and you are in my list (we have communicated via e-mail before). You are at risk, please take steps to protect yourself. READ THIS ENTIRE MESSAGE!!!

I received an e-mail a couple of days ago from a "Mark & Lyn". I assumed that it was from some member here at the RV park, who's name I did not recognize. I came to find out this morning that the file attached to that message is a virus.

The file is named Pretty Park.exe

Pretty Park is a privacy invading worm. Every 30 seconds, it tries to e-mail itself to the e-mail addresses in your Microsoft Outlook address book. It has also been reported to connect your machine to a custom IRC channel for the purpose of retrieving passwords from your system.

My apologies to all who may have received it via me...

Chuck

Details of the e-mail message are at the bottom, here are some links to clean the program off your system... and prevent further problems.

For info on the virus, and a program to clean it off your system, go here... http://www.getvirushelp.com/PrettyPark/info.ssi

If your using Microsoft Outlook (comes with Internet Explorer), go here for a program that will scan your e-mail for attachments containing a virus...
http://download.cnet.com/downloads/0-10093-100-907946.html?tag=st.dl.10000_103_4.1st.titledetail

If your using Microsoft Outlook 97, go here for a security update...
http://download.cnet.com/downloads/0-10063-100-911311.html?tag=st.dl.10001_103_4.1st.titledetail

If your using Microsoft Outlook 98, go here for a security update...
http://download.cnet.com/downloads/0-10063-100-911308.html?tag=st.dl.10063_103_1.1st.titledetail

If your not using any kind of Virus Scanner go here and download the best... McAfee Virus Scan (it's a big file, but worth the download time)...
http://download.cnet.com/downloads/0-10093-100-909955.html?tag=st.dl.10001_103_1.1st.titledetail

I am looking to buy a Highway Zapper. They don't make these anymore, and I
cooked mine. They produce a 10.525 ghz signal that makes radar detectors go
off. I'll consider home made items as well.
thanks

That is the bottom line. If you do a search on DejaNews, or see warnings about the
person on the newsgroups...you can avoid the deal altogether.

>   Besides, why would I want to send money to a total stranger? When I

Absolutely true...even checking out the references of a person or business is not
a
guarantee that the deal will go smoothly.

>   Unless you do a lot of business, the situations you describe above are
> very rare. I've done business with UPS and FedEx for years and have

> only had problems a couple of times (usually circumstances other than a
> straight transaction involved).

I mostly deal with UPS. FedEx has been problem after problem at work (Police Department) and at home. My department will no longer deal with FedEx at all.

>   You're claim that a person can file a "fraud complaint with the Postal
> Inspectors" really would make me nervious dealing with you.

Why would you be nervous dealing with me, you don't even know me? I have completed hundreds of deals over the internet without a problem. Why are you prejudging me without dealing with me?

> If you know
> as much as you suggest, than you should know that no investigation is
> launched unless large amounts of money are involved or a history of
> complaints exist.

That is not true. I deal with the Postal Inspectors on a regular basis as a police officer and they are very cooperative. Local/State police agencies on the other hand will not get involved unless it is thousands and thousands of dollars, and even then we won't get too involved. Extradition is very expensive, but not for the Federal Government.

> Therefore, to hide behind this to justify your
> business practice of accepting only money up front, when you know that
> nothing will be done if the person complains about you (assuming you did
> rip someone off), clearly suggests to me that I would not want to do
> business with you.

I'm not hiding behind anything, if you choose not to do business with me that is your choice. I have never ripped anyone off and have been burnt twice, but I learned after being burnt. Those people have paid for their bad dealings with me, and that is how it should be.

Piero

I have a mint condition FT-1000D which was returned to Yaesu in January of this year. They completely aligned and "updated" it. (They didn't say what "updated" means but I had asked them to bring it up to current specs.

I am asking $2,900 and I will ship UPS surface in the continental USA.

Thanks... Ed, W5EJ

it does it all and at 50 watts.   up down mic, quick release mobile mtg. bracket. Great shape, it mobile rig, it has never been pulled in and out of the car, avoiding all the scratching that goes with that. Super extended receive, off the wall offsets if you wish or just regular like everybody else. 220.00   Will consider trade for a shortwave receiver, very narrow vision when it comes to portable receivers, only very top of the lines will be considered.

X-Complaints-To: abuse@eskimo.com

Two TenTec Centruy 21/ mod 570.

Both have the crystal calibrator and both are in pristine condition. Both have manuals.

Asking $200 each, plus shipping.

G Hopper
ghopper@eskimo.com

Thank you for reading. I have a couple of GE PLS portables and know very
little about them. I am curious how they are programmed, where to locate
some batteries for them and and any manuals that might be available for
them.

Please reply to khoerz@accessus.net

Thank you.

Sorry if this is off-topic.  Will be traveling from DC. to Fl. via. I-95,
anybody have a list of 2m and or 70cm. repeaters along with PL's for this
route?

How long does it take to drive from DC to FL? I am planning a vacation here in May (yes, will be at Dayton) I will be visiting friends over in Ft. Meade, Maryland and then head for FL.

I have an Eimac 3-1000Z, date code 8718, that has been in my basement
for 10 years or so. It is in an Eimac box, but the box is labeled
8164/3-1000Z. I "eyeballed" the filament connects and it ohms out.
I have no way to test it.

Useful to anyone?

Thanks,

Steve.

I used to us one (auto door opener) on my truck. It was nice to have
when those big-rig trucks and other A-holes tailgate you.
One click of the switch and away they go.

FS Kenwood TS690S/AT

160-6M (auto ant tuner through 10M), all mode
1.8 Khz SSB filter
270 Hz CW filter
CTCSS encoder
DTMF mike (as well as original hand mike)
2 DC car power cables
Matching speaker and power supply
I'll throw in a like new Vibroplex paddle and MFJ keyer
All manuals and most original boxes

I am the original owner of this nice HF rig. Spent many nites and weekends enjoying ham radio. I moved to Baltimore into an apartment (from NC) and now just don't have the ambition or time to do covert HF. This is a nice rig, with just some barely noticeable scratches on the top where I laid the ps/speaker. The only other problem I know of is the front speaker jack is not working (didn't have the heart to open the hood - in fact, its never been opened up and I haven't put my hands inside). This would be a great starter HF rig and you get 6M to boot (and can work 6M FM repeaters as set up plus you get SSB/CW on 6 as well).

$750.00 (see ebay and know this is a very reasonable offer considering what you're getting). Package only, I will not split.

Note: pickup only West Baltimore (Owings Mills, MD). I will consider meeting you half way.

TNX DE N4SJW

Need Motorola RIB to program MT2000, MTS2000, GTX Portables and Mobiles, Spectras. Also need capability to program GE MVS Mobiles. Would like to

purchase or trade for used equipment since we are a volunteer organization.
Any help would be greatly appreciated.

$650 plus shipping from 71201. Weight 20 pounds

Icom IC-751A HF All Band Transceiver
Serial Number: 39xx

-160 thru 10 meter HF transceiver
-General coverage receiver from 100kHz to 30MHz
-All mode: SSB, FM, AM, CW, & RTTY
-Continuous Duty Operation at 100 watts RF output
-32 tunable memories
-Receiver range: 105dB
-Electronic keyer, semi or full break-in rated to 40 WPM

-Volume control-tracking sidetone
-RF speech processor and tone control to produce sparkling clear audio
-RF power control independent of microphone gain, ALC, and speech processor

Also includes:
Icom SM-6 desk microphone
Icom original Instruction Manual
Icom original Service Manual

Installed Filters
9 MHz IF
- FL32A (CW/RTTY, 500Hz)
- FL80   (SSB, 2.6kHz)

455kHz IF
- FL44A (SSB, 2.3kHz)

Other Accessories Available (will not be sold before transceiver)

Icom IC-PS30 -- External AC power supply with volt/amp meter, 13.8vDC, 25 Amps. Matches IC-751A in design and color. I will need a power supply for my new transceiver, so I would prefer to trade for comparable power supply, such as Astron RS35M.
$100 with transceiver, $125 if separate. Buyer pays shipping via UPS Ground.

Icom UX-14 -- CI-IV/CI-V Converter for computer control of transceiver (requires Icom CT-17). A rare item, if you don't know what it is, chances are you don't need it or wouldn't use it if you had it.

trolling for tail lights.  5 extra points if they go into a skid.  I still have my
zapper, loads of fun down here on the bottom.

Where do they go?

I talked to the vendor selling the "Zapper." I told him that I thought it was irresponsible and dangerous. There's enough pileups and dead people along the highway without the zapper.

Johnson Invader 2000 Transmitter -Rare!

E.F. Johnson Invader 2000 transmitter. Note that this is the "2000" model, the high power version, not the more common low power unit.
Condition is good. Front panel is near perfect, but cabinet needs an over spray. Unit is complete except for the connection cable. All tubes on the RF deck have been removed for cleaning and shipping. Tubes will be properly packed and shipped along with the transmitter. Output is CW, SSB and AM! Would make a super addition to that boatanchor collection.

Includes a copy of the manual. The unit is complete and would make a super simple restoration, or parts rig. I have checked the plate transformer and it is working just fine. But with out the cable I am not able to power the unit up. The cable is a simple affair with a male and female plug, seven pin if I recall correctly, which can be readily found at hamfests, or purchased from a parts supplier. I purchased the unit a few months back for a winter restoration project, but at this point I just do not have the time available. Aside from the cosmetic issues mentioned earlier, the unit looks to be in very good condition for its age.

Buyer will be responsible for pickup or shipping costs from Buffalo, NY. Can also deliver to local hamfests in Western New York region. Thanks!

Not to worry about poor little Brian. His economy car is a Suburban with skid
plates underneath. He might get slide right over you sometime. Zapp away!

Then WHY should anyone take the Time to provide Infrormation he
is TOO lazy to Look UP. It is not like it is hard to get.

Johnson Invader 2000
Transmitter -Rare! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=
292171193

E.F. Johnson Invader 2000 transmitter. Note that this is the "2000" model,
the high power version, not the more common low power unit. Condition is
good. Front panel is near perfect, but cabinet needs an over spray. Unit is
complete except for the connection cable. All tubes on the RF deck have been
removed for cleaning and shipping. Tubes will be properly packed and shipped
along with the transmitter. Output is CW, SSB and AM! Would make a super
addition to that boatanchor collection.

Includes a copy of the manual. The unit is complete and would make a super
simple restoration, or parts rig. I have checked the plate transformer and
it is working just fine. But with out the cable I am not able to power the

unit up. The cable is a simple affair with a male and female plug, seven pin if I recall correctly, which can be readily found at hamfests, or purchased from a parts supplier. I purchased the unit a few months back for a winter restoration project, but at this point I just do not have the time available. Aside from the cosmetic issues mentioned earlier, the unit looks to be in very good condition for its age.

Buyer will be responsible for pickup or shipping costs from Buffalo, NY. Can also deliver to local hamfests in Western New York region. Thanks!

Knight TR-106 6 Meter Transceiver -Like New! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293616374

Knight TR-106 6 meter Transceiver in like new condition. I have never seen a cleaner TR106, Absolutely perfect in cosmetic and electrical condition! Comes Complete with Original Operators Manual, Construction/Service Manual, and large Schematic. Also includes the Knight Noise Canceling Microphone. Amplitude Modulation (AM) via plate and screen. Can be either VFO, or Crystal controlled (3 sockets) for TX operation. Receiver uses built in VFO for wide range tuning from 50 to 52 MC. A single 2E26 final offers 15 watts of RF input.

Output network with match a wide range of antennas from 30 to 90 ohms. Can be powered from 120VAC with included power cable, or 12VDC.

A very unique and mint transceiver for the Knight or Boatanchor collector. I have tested the unit personally on my bench and find it works just great!

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

Thanks!

Heathkit DX-60B Transmitter -Mint! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293635395

Here is one of the nicest DX-60B transmitters that I have ever owned! Paintwork and front panel is perfect. I have tested the unit personally on my bench and find it works just great! Offers 90 watts of CW and AM input into a single 6146 final tube. Covers 80,40, 20, 15 and 10-meter bands. Clean units like this one are getting harder and harder to find, it even has the original Heathkit knobs, now that's a change! Has an internal holder for up to 4 crystals or VFO input .Pi output circuit offers wide matching of a variety of antenna impedances.

Comes with a copy of the Operations and Assembly Manual.

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

I have included seveal hi-res photos of the top, front and manuals of the unit, please wait for them to load

Thanks!

Heathkit HW-16 CW Transceiver -Very
Nice! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293658940

Great moderate power CW rig for home or portable/field use. Runs off 120VAC, but its small size and lightweight make it a nice travel or vacation rig. RF output is 50 to 90 watts, adjustable from the 6GE5 final tube. Grid block keying with automatic antenna switching and receiver muting. Frequency coverage 3.5 to 3.75MHz, 7.0 to 7.25MHz and 21.0 to 21.25 MHz. Uses either Crystals or VFO drive.

In really nice condition, a solid 8.5 out of a scale of 1-10. Has not been hacked up for modified in any way. I have serviced and inspected the rig, replacing the weak tubes, and some resistors that had changed in value. Works like new now!

Comes with the Original Operations and Assembly Manual.

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

I have included several hi-res photos of the top, front and manuals of the unit, please wait for them to load

Thanks!

National 183 Receiver -Classic and Nice
Too! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293688875

Here is a classic boatanchor receiver, the National 183. These are getting tougher and tougher to find. This one is in very good condition for its age. Works and sounds just super! Coverage from .54 to 31 MC and 48-56 MC Coverage as well! Calibrated band spread for the Amateur bands of 6, 10-11, 20, 40 and 80 meters. Receives both AM and CW with the built-in BFO, can also detect SSB with proper tuning.

Double diode noise limiter and 6 stage Crystal filter work great in noisy and crowded band conditions. The Push-Pull audio, using a pair of 6V6 tubes offers that classic boatanchor sound, with plenty of audio.

I have checked this unit on my bench and I am very happy with it. It does need some very minor cleanup, but would look and work great in any shack right now.

Comes with a great copy of the original manual, complete with service info and schematic!

Buyer to pay for unit in money order or cert. funds within 7 days of end of auction. Buyer will be responsible for shipping from Buffalo, NY 14051 zip code.

Please wait for the hi-res images to load.

Thank you!

National NC-183TS 10" PM Speaker -very
Nice! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293711557

Here is the matching permanent magnet loudspeaker to the National NC-183, NC-183D, NC-183R receiver series. Cabinet and speaker are in very good condition. Sounds just super, especially with the 6V6 Push-Pull Audio Output in the 183 series.

These speakers are hard to come by, especially in condition such as this, so don't miss it!

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

Thanks!

If it is for auction on E-Bay 'PLEASE' state so in the Subject i.e.:
FA. Do NOT put in FS: since the equipment is "NOT" for sale but
auction. Most on here don't want to see things that are for action
since E-Bay is a BIG rip-off.

anyone have any of these critters around?

4x150g/8172 tubes need some sockets.

thanks for your time

The socket is a SK2A type. It can be found with RF Parts at
www.rfparts.com/sockets.html
or with Svetlana at http://www.svetlana.com/docs/tubeframe.html
or at http://www.surplusales.com/Tubes-Sock-Acc/TubeSktsmain.html (much cheaper)

I bought this antenna when my Larsen on-glass antenna failed to work properly on my new car. Then I found out that something in the windshield tint was interfering with the coupling of the two halves of the antenna. The two antennas went in a drawer for 3 years. Now I'm cleaning up my "shack". I don't remember what the brand was and a check of catalogs and receipts reveals no further clues. The antenna is in as near perfect condition as it can get short of being in the shrinkwrap.

Includes: Antenna element, base plate for element, coupling on the inside of the car, coax with connectors and a brand new mounting kit.

Picture: http://www.eskimo.com/~ghopper/onglass2.jpg

$45 plus shipping.

I have a HP 95LX Handheld PC in Near perfect condition. Runs on 2x"AA" standard batteries.� It has Lotus 1-2-3, a HP Advanced Financial Calculator, Appointment and Phone Book, Memo Editor, Data communications capability and a file manager. Features MSDOS Version 3.22, full QWERTY keyboard LCD graphics display - 16 lines by 40 columns. Includes manuals, PC, and whatever else came with the palmtop. Perfect for mobile packet or whatever other cool dos based ideas you can come up with. I had intended to use it to set up a backpack portable packet station. I never found the time.

Also included is the optional communication kit which consists of a cable to connect the HP 95LX to a pc through a serial cable, software and manual. I am willing to sell this seperately once the 95 sells.

$115 including shipping. Firm.

Come on, Thom, I sent a 50lb amplifier to NC, and it only
cost $11.00

recheck that shipping cost!

In my book, $15 is very close to $11.  Especially after finding or buying a
carton, packing and driving somewhere to ship it.  Never mind filling out forms.
Al

I have for sale the following items-
1) Icom IC-251A 2 Meter All Mode Tranceiver.
This Radio is in Good to Exellent condition.
10 Watts SSB,CW   1-10 Watts FM
Comes with a Hand Mic.,Icom SM-2 Desk Mic. and Original Manual.
$300.00 Shipped CONUS

2) TenTec 1209 2MTR-6MTR Transverter.
Exellent Condition!
This is an almost new factory built unit from TenTec.
8 Watts out on 6Mtr.
$130.00 Shipped CONUS
(Works great with the radio above!)

3)Mirage B-310-G 2Mtr. Amplifier.
Exellent Condition!

Watts Out	25	50	75	95	100	100+	100+
Watts In	0.25	0.5	1	2	4	6	8

Built-in low noise GaAsFET receive preamp 15 dB gain.
Great for an old IC-706 or for the radio above.
$155.00 Shipped CONUS

I can email digital pictures of above equipment if intrested.
Thanks

I have a new B&K high voltage probe that I bought years ago and never used. I'm cleaning up the "shack" and this is one of the items to go.

Perfect condition.

I'm looking to buy a desoldering station with the vacuum pump built in.
I'd prefer a Pace or Hokka system but will consider all offers. Please
respond directly to me at ghopper@eskimo.com

Thanks

Hello,

I originally purchased the equipment below for an amateur radio project, but I lost interest in pursuing the project. If anyone else would like to try their hand, or whatever, please be my guest. Phones are in good working condition far as I can tell. Would like to sell everything as a package. Serious offers considered.
TERMS: Prepayment by postal money order, prices include UPS ground shipping or USPS Insured where applicable. I will also consider trades for Motorola Star-Tac accessories such as a Motorola Star-Tac Desktop Charger(s), high capacity Lithium-Ion batteries (black), etc.

(1) DiamondTel Mesa 90X, in very good condition, with tabletop phone/spare battery charger, two standard NiMh batteries, car adapter, and instruction manual .... $ 40.00

(1) Motorola "Flip Fone", lt. gray. This phone is in good condition with standard battery and tabletop phone/spare battery charger ...... $ 25.00

I also have the following accessories:

(2) used antennas, one "back of the set" antenna and a "window" portable, both rubber ducks .... $ 5.00

(1) used battery eliminator for the DiamondTel 90X .... $ 5.00

(1) Brand New in the package battery eliminator for the DiamondTel Mesa 90X .... $ 10.00

(1) Brand New in the package 6V NiMh Lt. Gray battery for Motorola "Flip Fones", Micro-Tac, etc. .... $ 10.00

(5) Brand New in the package 6V NiMh Black batteries for Motorola "Flip

Fones", Micro-Tac, Flare, Elite, etc. ....(EACH)$ 10.00

(3) Brand New in the package NiMh batteries for DiamondTel (EACH)$ 10.00

If interested, please e-mail directly n3fvg@worldlynx.net Thank You

Have original AEA isoloop parts. Big black body cracked after too much UV
and too many birds!

The band and variable cap with the stepper motor drive and controller box
with power pack are available. All in good working condition. Even have
100 ft of controller cable!

Make offer, including shipping.

Ham Radio University - HRU2000
Babylon Town Hall Annex
Phelps Lane & Miller Ave
North Babylon, NY
Sunday January 23, 2000
9:00 AM - 2:00 PM

This is a special day of education for amateur radio. Many ham radio Clubs and organizations from the New York City-Long Island Section will have information booths. This is your opportunity to meet the local clubs and organizations and learn their activities, meetings and membership. There will be a free tune-up clinic, DXCC & WAS card checking, eye-ball qso room, a full VE session along fifteen technical forums with guest speakers from the NLI section.

Donation: $2.00. Spouses and children under 12 will be admitted free.

For more information via Internet: http://arrlhudson.org/nli/hru2000.htm

Contact: Phil Lewis N2MUN (631) 226-0698

Hi;

Repair shops / tube audio gurus / radio buffs take a look!

One lot of tube shields for the 9 pin miniature tubes (12ax7,
12au7...etc) these are the twist-lock spring-loaded type used in
radio and tube audio gear.

There are over 300 in the lot and the current bid is $15.50. I have
seen these go for over a buck a piece at hamfests and over $3.00 each
on the net.

Stock up now!

Don't miss out on this one!

Have a few scarce adapters for C adapters to improve the flexibility of
your coax connections to that
R-390A or other boatanchor.

1. UG-576A/U 90 degree "elbow," C male to BNC female

2. UG566/U "T" type, C male to two BNC female

3. UG-635/U "straight-thru" C female to BNC male

4. UG-643/U strsight-thru "barrel," C female to C female

$20 each shipped CONUS (will ship internationally, but buyer pays
shipping charge). Tks es 73!

NOTE: This is a new listing. If you contacted me before about another
T/R switch, please contact me again; I've lost some email files.

Have just found (in a local estate I'm helping to liquidate) a VERY nice
E.F. Johnson model 250-39 T/R switch. It is Collins-scale excellent
cosmetically and electronically. It is complete, looks great, works
great, and is ready to go. I can sell it for $145 + $5 to ship. Tks es
73!

Hi;

Repair shops / tube audio gurus / radio buffs take a look!

One lot of tube shields for the 9 pin miniature tubes (12ax7, 12au7...etc) these are the twist-lock spring-loaded type used in radio and tube audio gear.

There are over 300 in the lot.

Stock up now!

Don't miss out on this one! Only 22 hours left to bid!

I am selling my Kenwood TS-850SAT for $1150.00. Here is what is included:

TS-850SAT
MC-80
SP-31
IF-232
YK-88SN-1
YK-88CN-1
YG-455SN-1
DVRU

I have original boxes for the TS-850, SP31, YK-88SN-1 and the YK-88CN-1. The other boxes are lost thru carelessness.....

Condition is very good to excellant.

Was used by a little old lady (BFB) who only talked to her neighbor (?). No, that was the truck, I think.

I am the original owner of this unit. It has not been bastardized to put it on 11 meters or "MARS". It is truly in factory condition. You want to break it, buy it!

Hi;

One lot of (250) 9 pin miniature tube shields. These are for the
12AX7, 12AU7 ...etc tubes. Current bid is only $10.50 on the entire
lot.

I have seen these go for over $3.00 each on the net.

This is the last lot I will have up. I doubt you will ever find a deal
like this again!

He he - or by looking at it through a pair of CB glasses!

Oh and don't forget to ground it to that bucket of salt water in your
trunk!

Otherwise you will only get 2,800 Watts output to your K-40, good
buddy!

I would like to buy a dual band rig for the base. I am not too worried about who makes it except I need cross band repeat. If you have one in good condition, please get back to me...

I have a very clean and neat and 100% operating Icom 73 that has the narrow cw filter, mike and power cord. It has been refinished with a baked on course charcoal green splatter that is extremely attractive and DOESN'T GET SCRATCHED UP NO MORE, when going from rental car to rental car that I did for years.   It is a solid radio, anyone that has owned one will tell you it has a really hot receiver. I have dxcc mobile, wac and was mobile with this rig. 295.00 shipped CONUS. You think it's not a handsome rig, ship it back within 2 days from your receipt of the rig. This is a good looking work horse.
80 thru 10 es WARCs.

ICOM IC-706 HF + 6M + 2M Radio $1400(Canadian) or reasonable offer
Comes with MB-62 Mobile mounting bracket for faceplate & OPC-581 3.5M separation
cable, original box, spare power cables, manual, and manual for CIV control.
Excellent like new condition. Radio specs are
100W HF all mode, all bands, except AM which is 40W,
100W on 6M all mode, and
10 W on 2M all mode. (Amplifier listed below)

Heil HM-10-Dual microphone (type 4 and type 5 cartridge) $150 c/w FS-1
Foot switch and MA-1 Adjustable boom.

MFJ 949E Deluxe Versa Tuner II $150 Like new, works great

Daiwa LA-2080H 2M Linear (FM + AM/SSB/CW) amp with preamp $150 Brand new
still in box

Bencher BY-1 Iambic Paddle (black base) $75

All prices listed in Canadian currency. I have been using the station for
approx 1 year, and now must sell quick. I have received excellent
signal/audio reports from all around the globe.
I would prefer to sell the items as a package for $1800 obo but will
consider seperating for pricing listed above. To buy the tranceiver, you
must provide me with proof of a valid amateur radio licence.

1) The Cushcraft R-5 is a vertical 12/12/15/17/20 meter antenna, it needs no ground planes. It is "as new" in its original box. It was up on my house for four hours before a neighbor demanded it be taken down (CC&Rs) (No need for advice on CC&Rs though!!). Best offer, $100 or better, takes it.

2) ICOM IC-2SRA handheld 2m/440MHz 5 watt transceiver. This is the one with the extra receiver (and it's own small whip antenna) that receives all normal modes up through around 999 MHz or close to it. Includes manuals, box, rechargable batteries and charger. Best offer over $150.

3) Standard Twin Bander 144/450 MHz FM Transceiver C5718DA. Mobile 50 watt transceiver with all the controls and display in the microphone itself. This includes the extra-long cord so the remote 'box' can be mounted in the trunk if you like. Best offer over $150. Includes original box and manuals. The memory upgrade, 100 channels, is included.

Serious offers only please.

'73

No mods have been done to it.
S/N: 2272 (Yup! Its a good one :-))
on a scale of 9 to 10 its a 9.5
I have 3 of the optional filters installed:
FL-222 1.8Khz 455 sideband filter
FL-223 1.8 Khz 9Mhz sideband filter
FL-102 AM Filter

This item is a Heath HD-4040 that was featured in 73 Magazine. It
comes with a virgin copy of the magazine. A collector's item. Take
a look at the auction:

The NIR-10 is a DSP driven noise reduction/elimination unit made
to reduce audio noise. I used it for amateur satelite work. This
unit is going cheap. Check out the auction at:

These wouldn't be the ones for sale in the current Electronic Goldmine
catalog for $1.99, would they? Part number F2000.

Hello,

I am looking for one or two Jensen JSC-600S FRS Radios and accessories if possible. Would like the radios to be in very good condition and reasonable in price. Please reply directly to me.

Thanks,

Piero

Do it and you'll probably be added to the list for spam.
Sounds like a great way to get up a mailing list.

But then they won't be secret any more. What fun is a list of secret
frequencies if everybody else has it? :-)

Hello,

I am looking for one or two Jensen JSC-600S FRS Radios and accessories if possible. Would like the radios to be in very good condition and reasonable in price. If anyone knows of a retail/wholesale source (brand new), for these radios, please contact me. Please reply directly to me.

Thanks,
Piero

I have zenith windcharger forsale. Includes, blade(prop), tail section and generator. This is a wind powered generator. Charge a battery. It works, but could use a good cleaning and general restroation work. A perfect acessory for your pre Rural Electrification radio set or as a general battery charger for the shack. Will sell or trade(full or partial) for one(or more) of the items below.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
mobile HF rig.
Mobile HF antenna system.
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8
interesting radio/ham items (send me your trade list)
interesting computer items (send me your trade list)

Below is a list of items I have forsale. Below this is a list of things I am looking for. WIll consider trades or offers on all items.

HAVE the following

CDE rotor control box CD-45-II/Ham IV rotor control (control box only) good Workingconditon.

Sun Microsystem Sparcstation classic unix workstation, SCSI, 2 serial, network, color video card. 32mb ram, 2gb disk, keyboard and mouse. Also Solaris 2.6 cdrom also included good Working condition.

Telebit netblazer router. Use to route your home/office PC(s) to the internet. Does modem dialup/ISDN connects automaticly for you. Connect your entire office to a single dialup line. Supports 1 network interface and two dialout ports. Full documentation (heavy). good good working conditon

Motorla Bitsurfer Pro ISDN modem (TU). docs and power supply. (can be used with netblazer listed above for a high speed dialup router. Good working condition.

Exabyte 8200, Removed from service working over a year ago, not tested.

Nokia 5100/6100 external audio handset. Option HSU-1. This allows you to use a "phone" style handset on the nokia 5100/6100 cell phone for a more "mobile" phone look.
unused.

VDC-3500 digital camera, 640x480, 24bit, includes camera, rs232 interface and software.
used little.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed (need pl also).
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode

i'm looking for cloning software for an icom 706mk2g

i just want to program memory slots with all the options

haven't found anything to fit the bill yet.

thanks for your time

has anyone ever used the speaker mic w/ttp?

if this is a regular ht spk/mic and has touch tone on it, i would like
to acquire one if anyone out there has one to part with.

comments on this item would also be appreciated.
thanks for your time

I have zenith wincharger forsale. Includes, blade(prop), tail section and generator. This is a wind powered generator. Charge a battery. It works, but could use a good cleaning and general restroation work. A perfect acessory for your pre Rural Electrification radio set or as a general battery charger for the shack. Will sell or trade(full or partial) for one(or more) of the items below. Will sell outright for $350 plus shipping.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
mobile HF rig.
Mobile HF antenna system.
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8
interesting radio/ham items (send me your trade list)
interesting computer items (send me your trade list)

For sale:

Icom IC-W32A 144/440 MHz Dual Band Handheld

Advanced Operations Have Never Been Easier!

"With its five big watts and a plethora of features, the IC-W32A provides just about everything you could possibly need in an H-T. Best of all, perhaps, the IC-W32A makes a serious effort to take some of the pain out of using a small, complex piece of technology" -- QST, July 1997

- Dimensions: 2.25 (W), 5.5 (H), 1.4 (D), 16 oz
- 5 Watts of power @ 13.5 V
- 200 memory channels
- 8 character alphanumeric memory channel identification, keypad entry
- Backlit display and keypad
- ICOM rugged! Meets MIL SPEC C/D/E for shock and vibration
- Handheld to handheld cloning capability or PC programming capability
- Independent band controls for tuning and volume
- VHF/UHF exchange function

More detailed IC-W32A specifications and options at
http://www.icomamerica.com/amateur/dualhand/

For sale at eBay: M2 2MCP14 2 meter circular polarized antenna. Bidding starts at $75.00

This M2 2 Meter circular polarized antenna is new/never used (in the original box). It's ideal for satellite work, but is also excellent for terrestrial uses like ATV, repeater operation and long haul tropo DX. Specs are as follows:
Gain: 10.3 dbc.
Front to back: 20 db.
Boom length: 10'6".
Elements: 7H/7V.
Turn radius: 6'4".
Weight: 6 lbs.

Current price as listed at the M2 web site (http://m2inc.com/) is $169.00.

Take a look at
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=228456523.

I have a Packard Bell 486-50 Color Laptop.
12 Meg Ram
500 Meg Hard Disk
1 PCMCIA Slot
Windows 95

Works fine. Except the floppy drive does not work, but I will send a cable which you use with Win95 direct connect. In this way you can transfer files between two computers. The internal lithium battery for the CMOS need to be replace and the NICAD does not charge. I leave is plugged in and it works fine. The CMOS once set stays.

I have a 28.8/33.6 Megahertz X Jack modem and Xircom Network PCMCIA card I will through in if the trade warrants. (I don't have a dongle for the network card but you can easily buy on from Xircom.)

I am looking for Sony or Zenith (TransOceanic) Transistor shortwaves.

Thanks,

RM

I have a used Larsen dual band on glass antenna. It includes the antenna element, mounting base, coupler base and coax, and a new re-mounting kit.

Tinted windows kept me from using it on my new vehicle.

HRO catalog part # KG2/70-CX-PL $84.95

$45 plus shipping. Firm.

Hi -
I have for sale as a package the following:
Kenwood TS-870S S/N: 70500197

Stock this radio is all filtered up. the Queen of the current line of
Kenwoods.
Learn more about it here:
Kenwood Web site - TS-870S

Kenwood SP-31 matching speaker

Astron Power Supply SS-30 M

All the above are in cosmetically and functionally perfect.

Also included is the package beside the hand mic. is a Heil HM-10 Dual
(#4
DX and #5 Reg. Elements) Mic. with the kenwood cord. However I am
keeping
the foot switch. So you would need to pick up a FS-1 or HS-1 switch.
Now Iv had the Mic. since I was a teen and my last call is engraved on
the
Heil only. (Yes I quit doing that years ago). Just so you know.

Please view the items here:
http://www.wanfear.com/~rich/ts-870s.jpg

My price is $1725.00 shipped in the lower 48
I would consider offers on price but no trades please.

IC-775 DSP, mint condition with box and manual. Radio is serial #21XX.
This is the revised version with factory DSP and none of the problems
associated with the early production models. Asking $2750.00 you ship.

Thanks,

Bob

I have a complete 2 meter mobile radio.
Radio is an Icom-25A 2 meter synthisized radio. Includes orginal box,
schematics and parts layout sheet. (might have org docs someplace).
Radio has touch tone mic and power cord. Power cord is wired for a cigertte
light connections. I also have a 2 meter mobile antenna to go with the
radio. Quick in and out of any car. Complete mobile station. Good for mobile or
use for a packet or APRS station as well.

Asking $125. will consider offers or trades.

Hello Barry,

It could seem like a nice joke repeating all that "zeroes" trash that guy posted (hopefully by mistake), but you did it on purpose, and TWICE.
Isn't this a waste of bandwidth for us reading this newsgroup?
You could have done the same without all that garbage of zeroes, simply writing <snip> instead of all that junk, and we would have understood the same (and maybe liked it a little more).
The second time was a pure waste.
I hope you take this as a friendly guidance to netiqette.
cheers.

Thanks and best regards,
T-man

Note: when posting a Reply, please send me a copy
via email too so I don't miss any responses. Don't
forget to remove the "97" from my email address
inserted as an anti-spam counter measure...:-)

Can you give a phone # or web address for Thompson Electric?

Thanks!

RS Pro 2006 for trade. This is a 9 out 10 radio. It has the manual and ant. with it. It has been modified for increased receive. It covers from 25.0MHz to 1.3GHz. This is probably the best scanner for under 800 bucks. Would like to trade for an HF rig. I am posting this for my news group impaired friend N5PXH. Please reply via email to myself (and I will forward to him) or to George at spydor@hotmail.com . Would also consider cash offer but would really like a transceiver.

Below is a list of items I have forsale. Below this is a list of things I am looking for. WIll consider trades or offers on all items.

HAVE the following

CDE rotor control box CD-45-II/Ham IV rotor control (control box only)
good Workingconditon.

Sun Microsystem Sparcstation classic unix workstation, SCSI, 2 serial, network, color video
card. 32mb ram, 2gb disk, keyboard and mouse. Also Solaris 2.6 cdrom also included
good Working condition.

Telebit netblazer router. Use to route your home/office PC(s) to the internet. Does
modem dialup/ISDN connects automaticly for you. Connect your entire office to a single
dialup line. Supports 1 network interface and two dialout ports. Full documentation (heavy). good
good working conditon

Motorla Bitsurfer Pro ISDN modem (TU). docs and power supply. (can be used with netblazer
listed above for a high speed dialup router. Good working condition.

Exabyte 8200, Removed from service working over a year ago, not tested.

Nokia 5100/6100 external audio handset. Option HSU-1. This allows you to use a "phone" style handset on the nokia 5100/6100 cell phone for a more "mobile" phone look.
unused.

Motorla Mocat CB, 40 channel model 4000. radio works fine, but included mic is flakey.

VDC-3500 digital camera, 640x480, 24bit, includes camera, rs232 interface and software.
used little.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed (need pl also).
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8
interesting radio/ham items (send me your trade list)
interesting computer items (send me your trade list)

Ok Gary, let's deal. I have been after a Motorola CB for ions....what I propose
for a fair trade is a Regency MX 3000 30 channel mobile/base scanner. In very
good
condition, I replaced the lossy motorola connector with a BNC, touched up the
alignment (I'm a two way radio tech), and generally cleanedthings up a bit. I
have
the manual, AC adapter for home use, mounting bracket, knobs, DC line.
Other goodies for trade or sale:

Regency MX 5000 receiver, 25-550Mhz, AM, NFM, WFM manual, box, ac supply. Asking
$75.00

Radio Shack PRO 64 Scanner. 400 memories, does all the typical freqs, cell
blocked, although I've heard of a mod. Nicad pack, charger, leather case,
original
boxes $125.00

Yaesu FT 2700 Dual band mobile. Mounting bracket, duplexer, mike...works well, but
needs a new michrophone. Has pl encode/decode capability. $100.00

With that kind of poor customer service, and with all the other compitition out there, I think it would be safe to say, DON'T DEAL WITH LAKEVIEW ANTENNA COMPANY! If enough radio enthusiasits take this position, I'm sure it will hurt their business.

Pro Am antennas are easier to adjust.  You only have to do it once.

Piero:
Let me just say that if you want customer service, go with Larsen. Yes
they will cost a little more up front, and they might not look as
sleek as some, but you can't beat the warranty. 3 years. One time I
called them and said I had a probem with a dual band rubber duck, they
sent me a new one and said just destroy the old one, no questions.
Another time I had a coil on a 5 year old antenna crack (yes, I told
them I did not have a receipt and it was 5 years old), they still
replaced it free. Larsen has great customer service.

Where do I find one?
The GE Superadio is available from many retailers, including K-Mart,
Lechmere's and Costco, to name just a few. Bennett Brothers is at least one
mail-order source for the radio; Street price is between $35-$55. J&R Music
World in NYC also has it in stock and ships fast: 1-800-221-8180.

Refurbished radios may still be available from Thomson Consumer Electronics
at 800-933-5489; price is around $26 + $6 S&H, but call first.

```

Yes Doug, I do that now. I was not the one originally with the customer
service problem, another person was, I was only replying to their post.
I had a bad experience with Lakeview employees (owner?) at the 1998
Dayton Hamfest and I will never deal with them again! He was rude and
ignorant. The others working behind the table said he was having a "bad
day", but he didn't have to take it out on me.

Rick:

Check out the thread on "Solid-state replacement for the #83" that was running on the <rec.antiques.radio+phono> newsgroup last week. You will find a lot of accurate and useful info there.

What is the propagation like on this band?
How old is it?
How many memories and TX PWR levels.

Sounds like it probably is a very private band.
We have only 3 repeaters in my city on this
band.
Do you know the band allocation for this band?
How much of the band is shared with other services,
how much of it is simplex, etc.
Is the simplex coverage similiar to 450 MHz?
thanks

Looking for someone who might know where I can get the software to
program a MIDLAND model 70-265-48B handheld UFH radio....

I also need a cabel or the pinout info to make my own.

also looking for a Programing interface box or RIB for the unit.

Have lots of other RSS for /\/\, Kenwood, Maxon, Midland, Uniden, and
Vertex trade if so desired...

Thanks for any help..

Stan

I swapped a nice pool cue for a case of these, and have more than I can ever use. They consist of a passive-infrared motion detector and a UHF transmitter housed in one white plastic case about 5" high (they look just like the ones you see on the wall in banks and credit unions). When someone walks within about 40 feet in front, the unit transmits a "telephone-ringing" sound to a UHF FM receiver (lower portion of 70-cm ham-radio band).

There is also a "tamper switch", whereby the unit sends the alarm if anyone removes it's cover. They use standard 9-volt alkaline batteries.

I use these when I go camping. I put them on trees near the approach paths to my site, and sleep with my handheld scanner in the tent to receive the alarms.

If you don't need the wireless feature (or don't have a receiver) you can also tap off the internal voltage supplied to the RF PCB and use this to run a piezo alarm or a relay.

A four-pack is enough to protect a the major areas inside a house, or a campsite from all directions. 4 for $25, new in boxes and packaged with mounting hardware. Batteries not included, you pick up or pay UPS.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless" watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

I have for sale one Vertex 2011, and one Vertex 7011.

2011 is a 45 watt VHF radio
7011 is a 25 watt UHF radio.

I have the programming cable, and software. These radios are in excellant condition. Used indoors, and briefly used mobile. I would like to keep it as a set (both radios,cable, and software), but will be willing to seperate if I can sell all components. Would like to get $700 for the package.

Hello,

I am looking for a wide band hand held receiver, like a Yupertu MVT-7100.

To swap, I have an almost new Yaseu VX-1R dual band HT. It has wide,
75-999Mhz (minus cellular, except image) receive. I will include the
computer interface, software and a MFJ lapel mic.

I have a keyloader question that I am hoping someone
might be able to answer:

Will a Model T3011AX DES/DES-XL keyloader program
(load/fill) an older VHF Saber I (assuming the Saber has
the correct module in it)???

Thanks very much for your help!

I have 2 UHF P110 motorola portables, both working with the following exceptions:
1 has channel knob broken
1 Keys up when turned on, but it times out OK,
Both receive OK, channel freqs unknown. Otherwise, 8/10 condition with
(2)batteries, (2)antennas and (1) standard charger. I will take $300 for

the pair or consider trades for iCOM R10, Yaesu FT-50 or Alinco DJ-X10E

E-mail me with any questions
mailto:mcguyver@bv.net

I sold the other 5 already

Yes it will but I think it will only work on the older saber modules;

since your keyloader is an AX it won't do the later Advanced Securenet
or Multikey/OTAR. BTW, Panik's electronics had upgrade kits for the
AX/BX keyloaders to limited DX. And Batlabs has a good cross reference
list of encraption module part numbers.
Good luck.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless"
watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

I have for sale one Vertex 2011, and one Vertex 7011.

2011 is a 45 watt VHF radio
7011 is a 25 watt UHF radio.

I have the programming cable, and software. These radios are in excellant condition. Used indoors, and briefly used mobile. I would like to keep it as a set (both radios,cable, and software), but will be willing to seperate if I can sell all components. Would like to get $700 for the package.

RICK: The 83 is 5 volt 3.0 amp heated rectifier with fairly heavy
ratings for a receiver rectifier tube.It has a 4 pin UX-4 base?
I always felt the 83 was a forerunner of the 5U4 (octal base tube).
Maybe you could use get and use a 5U4. Have to change the tube base
though
Another alternative is to solder two solid state diode rectifiers into
an old UX-4 tube base and plug that in. However the full voltage will
come on the HT rail immediately you switch on. That may be OK or you
could add a bit of resitance into the circuit. Again you may be able to
do that on the substitute rectifier tube base itself and not interfere
with the units wiring at all.
You mention this is for a tube 'tester'. In that case it may not have
any filter capacitors to worry about when putting the full (peak)
rectified voltage onto the HT rail.
Just a few thoughts. Also try searching on <duncanamps> for info on the
83.
Regards. Terry S. Torbay, Newfoundland Canada.

Hello,

I originally purchased the equipment below for an amateur radio project, but I lost interest in pursuing the project. If anyone else would like to try their hand, or whatever, please be my guest. Phones are in good working condition far as I can tell. Would like to sell everything as a package. Serious offers considered.
TERMS: Prepayment by postal money order, prices include UPS ground shipping or USPS Insured where applicable. I will also consider trades for Motorola Star-Tac accessories such as a Motorola Star-Tac Desktop Charger(s), high capacity Lithium-Ion batteries (black), etc.

(1) Motorola "Flip Fone" Gold Series, dark gray, in excellent condition with leather case, tabletop phone/spare battery charger, Standard NiMh and slim batteries .... $ 40.00

(1) DiamondTel Mesa 90X, in very good condition, with tabletop phone/spare battery charger, two standard NiMh batteries, car adapter, and instruction manual .... $ 40.00

(1) Motorola "Flip Fone", lt. gray. This phone is in good condition with standard battery and tabletop phone/spare battery charger ...... $ 25.00

The DiamondTel Mesa 90X and the Lt. Gray Motorola Flip Fone were purchased at a local Amateur Radio show from an individual who I believe was a tinkerer. It wouldn't surprise me if the two were cloned, but I have never actually used the phones. I purchased them for a Amateur Radio microwave project but never actually used them for the project.

I also have the following accessories:

(2) used antennas, one "back of the set" antenna and a "window" portable, both rubber ducks .... $ 5.00

(1) used battery eliminator for the DiamondTel 90X .... $ 5.00

(1) Brand New in the package battery eliminator for the DiamondTel Mesa 90X .... $ 10.00

(1) Brand New in the package 6V NiMh Lt. Gray battery for Motorola "Flip Fones", Micro-Tac, etc. .... $ 10.00

(5) Brand New in the package 6V NiMh Black batteries for Motorola "Flip Fones", Micro-Tac, Flare, Elite, etc. ....(EACH)$ 10.00

(3) Brand New in the package NiMh batteries for DiamondTel (EACH)$ 10.00

If interested, please e-mail directly n3fvg@worldlynx.net Thank You

144 to 148 MHz, FM Mobile Transceiver. Maximum of 45 watts output. Hi and low power settings. MC-48B DTMF Microphone and mounting bracket included. Also original box but only a copy of the instruction manual. No DC power cable. Memory, Scan, CTCSS, Tone and more. I always get good reports on it. Excellent audio - always. It probably needs a lithium battery replacement though. One cold morning the information I had stored in memory cleared. It's a good rig, and shows normal wear and tear. $159.00 Buyer pays shipping.

 Approximatly 180 degrees W, or E for that matter, longitude! [varies with
civil
authorities.]
Look for anything from the Marshall Islands or New Zealand.
Ham types listen for ZLs, KH7 and KX6
Bo

The International Date Line does NOT cross any land mass.  Your
nearest lands masses are New Zealand and Australia.  Go here for more
info: http://aa.usno.navy.mil/AA/faq/docs/international_date.html

Can someone tell me where the international date line is?. I want to know where January 1, 2000 will begin first so that i may tune into SW broadcasts from that area of the world in an attempt to learn if any significant problems may be headed our way. Also, if anyone has any idea what a handfull of frequencies representative of that area (and time) it would be information useful to many out here, I believe.
Thanks and have a nice day.

Ray Miller   N2NJK

Icom IC-02AT with rapid charger.13.2V 1200MAH battery. Nice condition.
Battery okay, but needs conditioning.

First 100.00 plus shipping gets it.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless" watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

What's that small island/country to the west of Australia? I hear that's
the first country of the year 2000.

It "technically" crosses right thru the island of Taveuni in Fiji, but they opted to have it "detoured" around this country of 300 islands. I believe it is the ONLY land mass that is technically on the IDL.

Look on your globe at 180 degrees E or W, and about 15 degrees South latitude and you'll find it.

Since Fiji already has some infrastructure in the larger cities like Suva and Nadi, I'd look up and monitor their broadcasts.

I am looking for a source of passive IR motion detectors. Need at least 4 of these devices for a project but would be willing to buy more if a larger quantitiy purchase is possible.

Please respond directly to rafman2@earthlink.net

All help appreciated, Thanks,

RAFman

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless" watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

I have two motorola MOCAT cb radio's. Motorola quality in a CB radio.

Both are 40 channel units.
The first model 4000 is a 40 channel with a analog dial. Has Public Address switch (PA). Has top mounted speaker and jack for external speaker. The mic on this unit is a stock motorola mic and is questionable. It sometimes works, sometimes doesnt. With a "GOOD" mic this radio works fine.

The second is a model 4022, 40 channel with digial display, has PA, local/distance switch an an extend button (audio compression I believe).
A motorola mocat power mic is included with this unit. This one also has a top mounted speaker and external speaker jack.

Both units work, however 1 mic is iffy and I have only one power plug. Its a common plug so finding a replacement is not an issue. There is no mounting bracket for either unit.

Asking $125 for the pair. Will consider trades or offers. Looking for GMRS,FRS, ham radios, Also looking for mobile and hand held programmable scanners.

Following equipment for sale...need cash...must get things happening in my life, and that takes funds:

1. Yacht Boy 400pe: less than 1 mo. use...nice unit, w/ac adapter, manuals if I can find them: I would like $100 bucks, if possible, but will be flexible on the price.

2. radio shack DX-394 Shortwave reciever....good condition. I would like 75 bucks, but will be negotiable on the price

3. Uniden bearcat 100-channel scanner:bc198xlt: 50 bucks, but will gladly negotiate.

Buyer pays shipping costs...money orders preffered, but personal checks also accepted, provided they do not bounce.

Call 717-867-4876 ANYTIME, ask for Hank

Or, reply via email to: hank@ezonline.com

Thanks, friends.

What may be easier, is to find a mud, or talker, in .nz, or .au,
logon at around local midnight, and then see if anyone mentions
anything, or if you suddenly lose connection.
Or a webcam, etc...

Also, if computers start exploding, and everything more complex than
the lever stops working, it's likely to get at least some news coverage.
Plus, I assume that at least some of the TV stations will be broadcasting
live from there, as they go round the world, following the new day, so
those may be a source of info.

Can somebody volunteer to set up a site to which we could post
pictures of things we have for sale for viewing by potential buyers?
Set it up so they disappear after 1-2 weeks, maybe, to make it
self-maintaining.

That way, somebody with a gadget to sell could post his scanned photo
to your site so that anybody wanting to see it could just go there and
look. He could do the descriptive text along with the link in his post
here, and you have only the photo there.

No dealers should post photos, of course (you don't want to get
overwhelmed). Just for one-of-a-kind personal sale stuff. Sure would
save a LOT of trouble emailing photos to each inquiry (been there,
done that!)

Anybody?

Sure looks good to me, John. Thanks for the tip. I have to sign up to
post there, but then the public can view them, and I can simply post
the URL that takes the viewer directly to my photos. Next time I sell
something for which I have JPG's, I will use this service.

Thanks.

Or if you have access to a prom programmer (or even if you don't) go to
http://www.geocities.com/SiliconValley/5857/ and spend 20 minutes reading.
The proms are like $2.00, and Mr. Bennett's software works great.

Not exactly, the EPROM goes for about $6-10 apiece, retail. The suitcase programmer, on the other hand, is quite expensive. Helps to have friends who let you use theirs occasionally.

Hello to all.
I'm looking for this little tunable FM transmitter (87-108 MHz)that
was made in the late 1960's by Kinematix, model number "IMP II".
It's 3 x 1-1/8 x 2-3/4 in size.
It's black and has a slide power switch on the front.
A microphone could also be plugged into the top. It was tuned
with a plastic tuning tool.  This gem is in the 1967 Lafayette
Radio catalog for $39.95.
Does anyone out there have one of these at the bottom of a draw?
If so, and if it's in working order I'd like to buy it from you.
Let me know how much you want for it.
Please e-mail me direct at:    mrusso@hoflink.com
THANKS, Mark N2FLF

Always Available through Technology..... UNLESS SOMETHING BREAKS!!

HAMFEST October 24, 1999 - Lindenhurst, LI

GREAT SOUTH BAY AMATEUR RADIO CLUB
ARRL APPROVED LONG ISLAND HAMFEST - October 24, 1999

LINDENHURST, LI - NY

On October 24, 1999 the Great South Bay Amateur Radio Club will again sponsor an indoor Hamfest-Computer Show. The location will be at the:

Knights of Columbus
400 South Broadway, Lindenhurst, NY.
This is an ARRL approved Hamfest.

There will be radio equipment, electronic components, computers and accessories, software, books, technical manuals, ARRL information, Amateur Radio License Exams, Door Prizes.

Advanced registration is $15.00 each table. Tables at the door are $20.00 each. Contact Peter Portanova WB2OQQ at 516 541-4886 for table reservations. NO TABLES WILL BE RESERVED WITHOUT PRIOR PAYMENT due to the space available.

General admission is $ 6.00.

VE - ARRL - 12:00 NOON at Babylon Town Hall, 200 E Sunrise Hwy, Lindenhurst. For exam candidates please remember to bring your original FCC Amateur Radio license (if licensed), any C.S.C.E. forms that are pending, plus a photocopy of each, pens, calculator, formal form of ID (preferably photo ID), and the examination fee, to the exam session. 1998 ARRL/VEC fee is $ 6.35, exact change is appreciated. Novice exams are free.
The VE team is from ISLIP ARES Group and GSBARC. Thanks guys.

Talk-in will be via GSBARC Repeaters on 146.685 4Z(136.5) PL.

Food Service during the Hamfest will be provided by members of the Knights of Columbus Council.

Information is also available during the GSBARC 2 meter info net every Monday evening at 7:00 PM following the Newsline Report on the W2GSB repeater, 146.685 -600 4Z(136.5) PL required. You may also write to:

Great South Bay ARC
P.O. Box 1356
West Babylon, NY 11704

I had listed this a few weeks back, but the person who expressed interest did not send off payment, so I am relisting it once again. Tnx.

===============================

I have a Icom 756 transceiver in like new condition for sale. Unit comes complete with original box, manual, schematic, and other paperwork. Has always been used inside ham shack, and kept covered when not in use. Was used as backup transceiver. Has the Icom MARS/CAP mod professinally installed and documented. This is a outstanding receiver offering a bult-in tuner, DSP, Auto-notch, and graphic display. Unit works and looks like new. $1475, and I will pay UPS shipping and insurance to anywhere in the US mainland.

73,

Bruce KG2IC

Radio shack has a small wireless mic that plays via FM radio that might =
work for you.  Also try ALL electronics in Los Angeles on Vermont =
Street, they have a web page but you will have to do a search.
Good Luck

I don't know if you need that particular model, but I just ordered a =
kit from
Jameco for $9.95. Tunable 100 to 108 Mhz, 9 to 12V. They also have a =
stereo
kit for $29.95 which is tunable 76 to 108 Mhz, 9V. Both are about 2" x =
3".

```

This is what I got.

FM PLL TX 2-3 WATTS

R. Scott Communications LTD   phone 250 642-2859

They also got some 20-100 WATT

Its in Canada, don't know if they still sell.

Got mine for about $300. Its fully assembled, got a jumper switch block =
to
change freqs. Get about 1/2 mile on my setup.

xman Charlie

Hi Guys!

Trying to get together a decent little 2 meter mobile in the house to
access local repeaters (etc). Have everything except a good 20 amp PS
and the actual 2m rig. (Have a lead on a rigr, but nothing definate.)

So let's trade!

Here's some stuff I have for sale/trade:

Cobra 148 GTL - 11 meter rig. xlnt swing, 100% modulation, extra
channels, adjustable power, like new. Includes a power mic (Astatic
D104 Minuiteman II handmic)
$125ish

Little Casio TV-470 2" LCD TV. Works on 6vdc (4 AA"s or adapter).
$40.

MusicStar system - teachs m,usic, create MIDI songs,c reate multitrack music, etc. Includes mini keyboard and PC soundcard MIDI interface and a pile of software.
$40.

tnx - 73 - Ed - KF6YKM

Greetings Fulton..

Looks like you've got a nice unit!! However, I think at the price
quoted it may be competing with Time Step's PROscan receiver:

Reference:
Scroll down until you see PROscan APT Receiver, also click on the

pictures
http://www.time-step.com/apt/apt.htm

In the USA it's sold by Swagur Enterprises Inc. (joint cooperation) as illustrated at the following:
http://www.swagur.com/
On the left hand side of the screen click on   APT Satellite. At the new window, scroll down and find Swagur-TimeStep PROscan Receiver. Notice the USA price.

No doubt that your receiver does indeed offer some features that this receiver doesn't. One thing that is nice about the Time-Step PROscan Receiver is there's no squelch. The scanning portion of the receiver locks up once the 2400 Hz carrier of the click-click-click sound is heard as the satellite comes over the horizon. Yours may be designed the same way..

Cheers,
Gary

After the QST article regarding the inexpensive R139 over here in the states, many folks are going this route only due to the price. Ref.: http://www.hamtronics.com/ and the receiver at: http://www.hamtronics.com/r139.html . However, this is *certainly* not to be compared to what you've got!

..SNIP..

Trade even up: Viking Valiant 1 for Hallicrafters SR-150 or 400 with power supply/speaker, in like condition.

Freshly tubed, solid state modules in place of 846's. Front panel is exceptionally
nice; nearly mint. A few scratches and minor knicks on the upper lip.
Only draw back, someone widened out the right hand manual/ptt
switch hole. An on/off flange hides the flaw nicely. All knobs and inserts
intact and like new. Crystal knob cover is there. Lettering perfect. VFO
is beautiful.
The maroon cabinet has been painted, not a perfect job, but not bad.
Has a transmit-receive relay built in.

Let me know what you have!

Regards,

Cary Fries

Not meant to start another thread on ebay, but this type of thing is unscrupulous at best:

RARE HEATH HW-101 SB-101 CB 11 METER CRYSTAL!
Item #182756483
Expand the capabilities, value and resale value of your Heath HW-100, HW-101, SB-100, SB-101, SB-102 with this Magic Crystal. Simply remove the 10 meter crystal from your rig and install this crystal and you have 27 MHz operation (the 'beat' frequency of this crystal is 37.39500 MHz). You can transceive on SSB or CW on 11 Meters! Even install it to increase the resale value of the transceiver by magnitudes to a CB'er! Crystal is Brand New! Buyer prepays with shipping within 7 days of auction close.

I've sent a note to SafeHarbor@ebay.com about this, but wonder if anyone would like to comment on the legalities of this.

Buying or selling a crystal for any frequency is not illegal. Putting the crystal in a radio is not illegal. Turning the radio on and receiving is not illegal. Once you key the mike the picture changes...

I saw that too, and had to chuckle. It's not illegal to install
such a crystal, or to receive CB transmissions with the radio
once it's been modified. It's illegal to transmit, however.
Still, it's silly!

73,
    Dean / K5DH

Creative advertising at work, eh? But, do remember, in other parts of the world, outside of the United States, it is perfectly legal to operate even that green stuff on 27 MHZ frequencies! And, of course, that xtal can be ordered by the thousands from a multitude of crystal manufacturers around the globe -- so much for the "rare" aspect. Selling/having it is certainly not illegal per se, but ......

144 to 148 MHz, FM Mobile Transceiver. Maximum of 45 watts output. MC-48B DTMF Micophone and mounting bracket included. Also original box but only a copy of the instruction manual. No DC power cable (you can buy or make one easily). Memory, Scan, CTCSS, Tone and more. I always get good reports on it. Excellent audio - always. It probably needs a lithium battery replacement though. One cold morning the information I had stored in memory cleared. It's a good rig, and shows normal wear and tear. $169.00 Buyer pays shipping.

DON'T attempt a solid state replacement - unless you ALSO install a
dropping resistor to comphensate for the increased voltage, otherwise
you may damage parts, and make erroneous test readings...

Been there, done that...

I have Kenwoods and if-232 interface by Kenwood and I have a PK-232MBX
and i would really like to get new software for controlling the rig and
also new software for rtty and pactor. Help by suggestions and where I
can check it out would greatly appreciated.

Butch:
If you are looking for a Xcvr control program, Kenwood has a very nice TS570 program for windows that can be downloaded from their website. This program will also control other Kenwood rigs but the graphics appear to be styled for the TS750. You can download this program from: http://208.197.91.81/

For R-5000 or TS440 operation, fineware offers Smart Kenwood Control 32,
which I use with my Kenwood.  This software also provides a database for
broadcast stations.  To see this program, check out:
http://users.erols.com/fineware/skc.html  This program is outstanding.

With all due respect.
Texas Towers does not list it on their site.
Ham Radio Outlet Does.
Here:
http://www.hamradiostore.com/cgi-bin/uncgi/ase?MAN=Icom&MAX=1000&OPT=on
55) ICOM IC-AT130***SO, AUTO TUNER FOR IC-M710 $499.95 _______

I doubt that Texas Towers is much less.

Hi-
I have a mint w/ box and manual the Alinco DR-140 T PKT packet radio.
THis radio came from alinco without a mobile bracket or mic. It has
feet for desktop use. Included it a cable with a RJ 45 end on it for
wiring your tnc.
Please see a picture and specs here:
http://www.alinco.com/Products/dr-140t.shtml

$140.00 shipped in the lower 48. OBO
Please use my reply to email.

Hello group I have a Motorola base station power supply here it is 10 amp and a tough chassis color is black part#TPN1136A usually used for the MCX1000 radio but can work with any radio as long as you know what the positive and negative is! it looks like a 10 LBS. brick, I am asking for the best offer.........

thanks

LPU Intrinsically SAFE BENDIX/KING RADIO'S For SALE or TRADE
this is what i have to offer
3x 14 channel UHF hand held's (438-522mhz)model number LPU4141X
2x Speaker Mikes
2x Extra Batteries
1x Fast Charger
1x Programming Lead (PC to RADIO)
1x Software

these radios are in VERY good condition and are perfect for the
Emergency services as these radios are Intrinsically safe and can go
into petrochemical plants and the like

these radio can be upgraded to 192 channels if need be by fitting the
keypad to it but they loose their Intrinsically safe rating

asking $450 usd the lot or will consider trading with
anything to do with Radio e.g.: dual bander,small hf,whaterver

airmail to the US is $45 usd and delivery is 4-7 days

give me a email direct on mitch@nw.com.au
if you are interested

Hi, I've got a TR-4C, MS-4C, AC-4C for sale. The radio is serial number
34886. The radio might be a 9 out of 10. I never cared for that numbering
system much so I have pictures available on the radio and speaker/supply.
There is a scratch on the right side of the MS-4.It works great and I use
it all the time you can hear it on the air any time in the evenings or
Saturday morning, (depending on your location). E-mail at swb1@flash.net
for pictures. I'm asking $400.00.
I would consider a trade for like value equipment

Thanks
Steve KC5TFL

X-MimeOLE: Produced By Microsoft MimeOLE V4.72.2106.4

I have three Motorola UHF Visars for sale. All are in nice condition, working correctly, with a Motorola Ultra High Capacity NiMH battery (model NTN7394), antenna and detachable belt clip/holster. One has the keypad option at $350; two are without keypad option at $325 each.

I also have an 'as new' 6 gang Visar charger, model NTN7621C for sale. Immaculate except for some scratches on the bottom plate. Works perfectly. I believe the new price is in the $750 range. $325 including UPS shipping within the US. Would also consider working out a trade for a BP/BR base station duplexer at 460MHz. and/or a 16 channel UHF GP300.

I have several Collins 208U-3 3 KW 2-30Mhz RF Amplifiers. These are in good condition as removed from military service.

This is a military/commercial quality amplifier that uses a single 4CX3000A to produce KW PEP or average power with only 0.2 watts of input.

These are automatically tuned with a servo system that takes about 10 seconds to tuneup.

The primary power input is 200-250VAC, 3Ph, 47-60Hz.

The net weight is 975Lbs, size: 32" x 23" x 70" Tall.

If you have 3Ph power and the room one of these superb Amplifiers would make a great addition to your station.

I am offering these unpacked FOB Somis, CA as follows:

untested less the 4CX3000A Tube $2,750.00 unpacked.

I have a few tested and Guaranteed 4CX3000A tubes at $750.00

crating by a professional packer is $300.00 additional.

A complete service manual is included at no charge.

There is a photo of this item on our web site

If you need more info please contact me.

Hello group I have a 110 watt vhf syntor mobile radio model#T83SRA3200AK I got this in a trade a couple of months ago I have never used it so I really don't know if it works for sure but the person that gave it to me said it did when taken out of service the casing has a couple of scratches radio has 8 channels ranging from154 MHz to 155 but you can have it recrystalized to your frequency it is also pl. capable radio comes with 2 microphones, speaker, control head, a scan head, and a cable harness.....   70.00 takes or best offer. I pay shipping.... let me know

thanks

Hey - you never know if you want to change the crystal filters in the IF, maybe narrow band the thing... I guess... otherwise, I would reprogram the thing, myself.

The Syntor doesn't use crystals, it uses an "R prom" that is "burned" by the programer. It is not re-writeable, it can only be used once. Every time you want a new freq., you have to burn a new prom. VERY EXPENSIVE, unless it is going to be used for a repeater or in the Business band where it was originally meant to be sold.

PicturePacket is a Windows95/98/NT control program for TNCs. In its Lite mode it's all the software many packet users may ever need, and it's free! Download version 1.41 from the SA Watch/KaWin/PicturePacket home page: http://www.sni.net/kawin/

PicturePacket 1.41 adds Internet DGPS Beacon mode for registered PicturePacket/Plus users. Now, any packet radio station can beacon DGPS correction signals obtained directly from the Internet. This beacon data is decoded by the receiving TNC to dramatically reduce the position error of GPS.

You have been trying to sell this for months..

Get the idea that it is too expensive?

Toll Free

I just received an HF antenna that I think is a Hy-gain DX-88. There is a total of 8 small black coils and one is marked 80 40M ASSY, 878532, HyGain 1991. Since it has the 80 meter coil, I figure it is the DX-88. There are also coils marked for 10,12,15,17,20 and 30.

Does anyone have the assembly instructions for this antenna they can send or copy an mail. I will gladly pay for the copy charges. Ed/N3WJA

Robert:

So, how is this Ebay related?

Maybe I missed something, but it sure looks like a direct sale notification to me.

For Sale -

Hallicrafters SX-130 - complete but not too pretty. This radio must have been in the garage a few too many years as the slide rule dial lettering is coming loose from the glass and the chassis is a bit rusty.. It would make a good parts radio as it is complete with all of the original knobs, good power transformer, i.f. cans, etc. Actually if a guy could re-do the dial somehow, it would be a good restoration candidate, I suppose.

$50.00 shipped

Click on this link to view:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=165539516

Condition: Very good, original paint, no rust or corrosion

Extras: Spare modulator deck, wheeled roller base, service manual, 3 wire line cord, blower fan switch mod, and rear outlet cover power plate

Produced in large numbers during the 50's and 60's, the T-368 transmitter was used by the military as a multi-purpose unit. Affectionately known as the "T-3" a great many were placed in stationary RTTY service, while others were used for AM and CW operation. As a medium power transmitter the T-368 was overbuilt for continuous 7/24 service.

The unit weighs about 700 lbs., and is roughly cube shaped. Height and length are close to 41". It's modular construction allows easy access for service. The lower deck, and the most heavy, is the power supply section. The middle deck, and next lightest, is the modulator, and the top deck is the RF section. All decks are equipped with Cannon connectors and can easily be removed for service and troubleshooting. It fact it is possible to "hot swap" defective decks while the power is still energized with no adverse effects.

The T-368 requires very little in the way of conversion for use on the amateur bands. With its 450 watts of carrier, and heavy duty construction, the T-3 makes an outstanding amateur transmitter. A few simple safety and convenience changes are all that is required. See the Conversion button for more information.

For more info and photos of this unit, use this link
http://www.buffnet.net/~bhowes/t3sale.htm .

Due to the weight and size requirements, this unit must be picked up in Buffalo, NY. Or you can arrange pickup, crating and shipping at your expense.

Payment must be made within 1 week in certified funds.

Any questions, just email.

Tnx!

I have a absolutely mint Diawa 500 watt PEP automatic antenna tuner
model # CNA-1001 80-10 METERS, that I wish to trade for same condition
Sony SW55 or something near to this portable (2010 for example but must
be pristine) May consider a desktop. The Diawa supports coax-1,
coax-2, dummy load 12 volts DC.

Hi Ron,
            Has the HQ170A gone yet? Do you have any pictures. I am very
interested in getting one of these receivers.

Last chance to own a classic .....

Heathkit HW-8 QRP CW Transceiver

Operates on the lower 250 kHz of the 80, 40, 20 and 15 metre amateur bands.

Only modification from original is the addition of an SO-239 antenna connector in parallel to the stock RCA phono jack.

Check it out at

I have a Icom 756 transceiver in like new condition for sale. Unit comes complete with original box, manual, schematic, and other paperwork. Has always been used inside ham shack, and kept covered when not in use. Was used as backup transceiver. Has the Icom MARS/CAP mod professinally installed and documented. This is a outstanding receiver offering a bult-in tuner, DSP, Auto-notch, and graphic display. Unit works and looks like new. $1475, and I will pay UPS shipping and insurance to anywhere in the US mainland.

Additional Specs from website: The ICOM IC-756 is an all mode HF and 6m transceiver. It has a 4.9" blue LCD and dot matrix display, and features selectable AGC, microprocessor controlled automatic antenna tuner which also covers 6m, built-in Digital Signal Processing, built-in CW memory keyer with auto-count and repeat functions, CW reverse, dual watch (monitors two frequencies in the same band simultaneously), 100 memory channels, microphone compressor, RF attenuator (four step), RIT/XIT, spectrum scope with selectable passband width offers a graphical display of activity up and down the band, SWR meter, transmit tone equalizer, triple band stacking registers, twin passband tuning, VOX, 100% duty cycle (HF & 6m), and much more!

Thank you!

I have mirrored the RA file from NASA - it is of the Black Sea Capture of the Total Eclipse. You can see it not only at NASA's site, but at http://hfradio.org.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

73 de NW7US, Tomas.

Hi all. I recently did a job where we used about 500 LTS2000 Motorola portable trunking radios. Now I'm interested in purchasing some, but before I commit to them I'd like to check some stuff out first. I'm looking primarily for the RSS software so I can see what I can program these radios to do, but I'm also looking for any manuals ie. the radio manual and the RSS manual. Should I decide to buy these radios, I'm planning to buy most of this stuff new, but I don't want to spend all the money and then find out i don't need it. Also I'm having some trouble with my news programs, so if you could cc a copy of your reply to my email address, it would be muchly appreciated! Any info at all will be appreciated!

Thanks in advance for your help!

Hi! Everybody, I've a VX-5R for sales w/ LOT of accessories:

The package include the following items:

1. BRAND NEW condition VX-5R radio.
2. Box and Manual
3. Wall AC adapter/charger
4. CD-15 Stand charger
5. CSC73 soft case
6. SU1 Barometric pressure/ Altitude sensor
7. Comet SMA dualband antenna

If purchased seperately this package would run well over $420.

$349 shipped.

Thanks and take care!!

Hey Josh,

We have 35 of those radios in 900Mhz and they're absolutely lousy. Poor
r'cvr and transmitter preformance, only run about 6 hours on a charge.
If I could throw them away, I would. We've had a lot better luck with the
MTX9000 radios.
But you know what they say about opinions...

Dan

I have a Eimac 8877 tube forsale. It is
new and has been used once to verify operation.

It is in perfect condition with the exception
that a small dent in the heatsink. It is guaranteed
to work perfectly.

I am asking $250.00 or best offer by Monday
AM at 10:00AM

PS: I from time to time get RF parts and componenets and am offering them to
hams. If you are interested in getting my messages just let me know via
email.

Hello!

I have a Motorola T3011AX DES/DES-XL keyloader, and was
curious if anyone had an operation or service manual
that they did not need, or that I could make a copy
from?

Thanks very much for your help!

I don't know how many of you know of this, but I think you should consider joining this project with SETI (the SETI@home project). Major COOL!

What is the SETI@home project?

SETI@home is a scientific experiment that harnesses the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI). You can participate by running a free program that downloads and analyzes radio telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth.

http://setiathome.ssl.berkeley.edu/ is the URL - check it out.

Also, if you are interested, once you install the software, you might wish to join our group, the NW7US Radio Group -- you'll find us under the groups section.

73 de NW7US, Tomas.

Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe
this is the current revision; it has a production date of July 1997. In as
new condition except for a few scrapes on the bottom. Tested, and is working
perfectly. New cost is somewhere in the $700 range.

$325 including shipping UPS CONUS.

I am looking for any information on an old NEC ISS70 Schottky diode,
used as a mixer diode in a marine radar. Any technical data, or a
possible souce for parts would be appreciated.

I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

I am getting out of the hobby, so no trade offers please.
I live in Dayton, OH for those close by.

For info from Kenwood's web site go to......
http://www.kenwood.net/products/index.cfm?AMA=open&ama_mob=open&radio=TM-742AD&selection=Amateur

My unit is the 742A model (not the 742AD). From what I've been told, the only difference
is the AD comes with a back lit mic.

The price is firm. It is priced at less than 50% of what I paid.
I will pay the UPS shipping to you (US only).

Contact.....   greggw@erinet.com

Motorola UHF Visars. In nice condition, with Motorola Ultra High Capacity
NiMH battery (model NTN7394), antenna and detachable belt clip. Have several
without keypad option at $325 each; one with keypad at $350. Would also

consider a trade for a BP/BR base station duplexer at 460MHz.

You didn't mention the specific band, 406-470 or 450-512Mhz?

I have a very nice Kenwood TS-790 with the 1.2 Gig module. I would like
to trade for a nice FT-847 Yaesu. I have some additional accessories to
trade for like accessories for the Yaesu.

Please reply direct.

Thanks,

Bob

Do you wish to be alerted when Solar Flux, A index, or the K index figures change? Don't want to carry around a radio tuned to WWV, etc.?

I have a alpha-numeric pager that I can email. I know others have cell phones with the same feature. And yet others read email all day long.

So, I created an automated e-report with the WWV report. This email is only sent when one of the three figures change.

If you wish to subscribe to this e-report, visit http://hfradio.org, and go to the propagation center. There you will find a form that allows you to submit your email address to the list.

Also, I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Purchased this laptop about 1 month ago, my company purchased me another one less than 2 weeks ago. I'm looking to trade my laptop for a HF rig. Must be in excellent working condition as well as cosmetically good condition. MUST have built-in antenna tuner. 90's era radio's are all that I'm interested (other than possibly a TS-940SAT) that would also be considered.

Here is what I have.
Pentium 166 Mhz Laptop
16 Megs ram expandable to 80 megs
2.1 GIG hardrive
1.44 Floppy drive (swapable)
20 Speed CD Drive (Swapable)
12.1 Color Screen DSTN
56K PCMCIA Modem

Interested parties either email me at kc4oxp@flash.net
OR
Phone 770-867-5156 5pm-10pm EST

You are asking to much for to little. Laptops do not hold their value
like HF rigs do. A new 300 mhz or faster laptop with 32 or more meg of
ram can be had for 900 or less and they are falling fast in price.
Yours would be about half of that or less used today.

Just back from Yaesu for repair to 10tr FM Top of case damaged in shipment and Yaesu put a new top cover on it so it is obviously a little lighter in color than the original 17 year old bottom cover. Rig has ALL FILTERS, AM,FM,USB,LSB,CWW, CWN plus the CW filtering down to about 100 hz and shift will knock off a cw qrm 100 hz away from you. Continuous coverage receive 100 khz-29.999mhz. will transmit everywhere it receives except for the U.S. AM Broadcast band all optiones are on this rig and all updates by Yaesu. Mike and power cord.700.00 plus shipping.

2 Motorola MX-350 VHF portables, Model # H43AXU3120B, intrinsically safe, 2 channel, will talk to each other. Set comes with 1 rapid charger, 2 batteries, 1 speaker/mic and one belt clip/skeleton holster. Radios are DES/DVP equipped. Asking $200 for package. Will not split package.

Looking for dual band portable such as ADI 600 or similar.

Kurt

I have for sale an excellent condition HT-200 Motorola portable. Currently set to 147.15 MHz simplex. Radio is in collector condition. Complete with 2 batteries, DC charging cup, antenna and full leather case. This is one of the original "Bricks" as I know them in full operating condition.

Make offer.

Kurt

This is a correction to my earlier posting about the UHF Syntor X. It is a Motorola VHF Syntor X with 32 channels, 110 watt, Model # T83VBJ7J04AK. Drawer unit only, no accessories. Heavy unit to ship, would prefer pickup in St.
Louis area.

$125

1) Sony ICF-SW100 w/acc., no box - $200 shipped FEDEX CONUS COD
    Discount for local pickup - $190
2) Johnson Viking Adventurer   -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed
3) Heathkit VF-1   -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed

Will swap item 1 for QRP gear.

Items 2 & 3 above are "First Come, First Served". They where part of my original Novice station that I operated 22+ years ago. I rescued them from the previous owner who had left them in a shed and they have suffered exposure damage. I had plans to restore them, but just do not have the time. The Adventurer cabinet has some modifications that was done by the origianl builder (of whom I do not know). Not sure the cabinet is worth restoring.

Many of the SW55 photos I have seen, while very clear, might mislead people as to the size of the radio. This excellent receiver is less than half the size of an 8.5 x 11 in sheet of paper. A great travel radio. I love mine.
Brian Denley

I would strongly suggest that everybody BOYCOTT this radio.

the owner has NO respect for this news group, as attested to by
his "BAIT" post, NOT mentioning ebay. if this person is this
DECEPTIVE, he would not hesitate to Screw the buyer.

Just my opinion

Bob

I notice that the seller has changed his eBay ID recently -- maybe to ditch some previous unfavorable comments? He's also quite quick to mention that "Payment is to be recieved within 7 Days of close of Auction or negative feedback will be posted! "

Sounds marginal to me...

It is not always meaningful, but I am concerned with a seller with no feedback, and a bidder with no feedback. In the past, (at times) that combo has turned out to be illegal shill bidding. I have NO information that this is happening now. But I have run into it in the past.

Hello all,

Cleaning out my file cabinet of duplicates and manuals for rigs I
don't have anymore.

All are copies, but are in excellent condition. Not dog-eared, and
are crisp and white pages. All are complete cover to cover and are
3 hole punched in blue plastic-face binders (EXCEPT the Hallicrafters
Heath, and Gonset manuals which are just stapled).

Prices INCLUDE postage to any US Mailing address via US Mail.

1. T4XB (Transmitter) / T4 (Reciter) - $13 (Both units in one manual)
2. R4B Receiver - $13
3. TR3 Transceiver $13
4. TR4C Transceiver $13

5. MN-4 Tuner $8

Non-Drake:

1. Heathkit SB-614 Monitor Scope $13
2. Gonset GSB-100 Transmitter $13
3. Hallicrafters S-85 Receiver $8
4. Hallicrafters SX-110 Receiver $8

If interested, please drop me a note. Cash, check or MO all ok.

Thanks,

Dave WB7AWK

 Steve

The designator "9236/Malayasia" has no signifigance as to part type.
This is the date code and plant of manufacture, i.e. the device you are
looking at was an MRF648 which was manufactured in Motorola's Malaysian
plant the 36th week of 1992.

Try RF Parts http://www.rfparts.com. Thye have the device in their
catalog singly and in matched pairs. They are not cheap `8^(.

Good luck on your quest.
Dave

Gentlemen.

I am cracking up in the warmth.....

Let�s trade some treasures , with one another - ;-)

I have lots of European tubes , most is New In Box.
1920-30�s,Wehrmacht,1930�s power triodes,radar,traveling and micro wave, etc.

Lots of 1920-30�s European radios , and also some later Hammerlund,RCA recievers
and so on.

I am looking for some old power tubes, mainly triodes.

If you belive that I might have some parts or set�s , or whatever , that you need ,
please , do not hesitate to Email me.

- Sincerely Kurt Steffensen

Looking for a used, cheap (or free :)) 6m radio to see if I would enjoy it enough to want to fork out big money for a newer, better rig. Live in middle Tenn. I hear a lot of people like it, but have no access to one to try it for myself. Any constructive suggestions welcome!

Check out your area for a ham radio club to join - they exist in most
cities. A fellow member, or the club station, will no doubt have a 6 meter
rig you can try out.

9' Rohn Tripod. Heavy duty roof mount tripod tower. Has climbing rungs. A bit of surface rust; otherwise good condition. $20 or best offer. Pick up only, Hampstead NH.

Also, Commodore C64 computer with 1541 drive and commodore color monitor. C64 doesn't work. Best guess is it's the power supply. $20 or best offer takes the whole setup. Smith Corona daisey wheel printer. $10. Pick up only, Hampstead NH.

Newsgroups: rec.radio.amateur.equipment,rec.radio.amateur.swap

I have the following items that I would like to sell as a package or
possibly trade for some type of VHF/UHF equipment (dual band HT, mobile =
rig,
base rig, etc.) or some type of 10 meter equipment:

Small Wonders Labs SW40+ 40 meter QRP CW transceiver. Has optional =
factory
enclosure also has option Freq-Mite frequency counter. Currently set for =
the
Novice section of 40 meters (easily changed to General & up portions of =
the
band). Also includes a ten-turn pot that aids in tuning, but I have never
gotten around to installing it as the factory pot has served me well.

NJ-QRP Club Rainbow Tuner with optional beautiful and 'bulletproof'
enclosure. This is an awesome QRP tuner which tunes a longwire for 40 =
meter
operation. It is powered by an internal battery and uses four small =
'rainbow
colored' LEDs to indicate SWR. You can view details of the Rainbow Tuner =
at
http://www.njqrp.org The tuner is also easily converted to operation on
other bands through a kit which I believe the NJ QRP Club is still has
available. Connection to the SW40+ is made through a short piece of coax
with BNC connectors on each end, which would be included. The tuner
automatically turns itself on when it sense RF and run hundreds of hours =
on
the included battery.

I also have a Ten-Tec AC5 QRP tuner which I bought that is missing the =

top
half of the enclosure and basically needs to be cleaned and put back into
working order. I have never used this tuner, but all it needs is dusting =
off
and one of the connectors on the back repaired.

Depending on what is offered, either financially or in trade, I also have =
a
Vectronics keyer that has been built into a Radio Shack plastic enclosure
that conatains an internal speaker for code practice and is adjustable =
for
about 3wpm to about 30wpm. It is powered by a 9 volt battery.

I am 99% sure that I have manuals for all the above listed items and =
would
also provide them with the equipment.

If anyone is interested, please feel free to email me. Thanks and 73!

Jeff

enclosure. This is an awesome QRP tuner which tunes a longwire for 40 =
meter
operation. It is powered by an internal battery and uses four small =
'rainbow

colored' LEDs to indicate SWR. You can view details of the Rainbow Tuner =
at
http://www.njqrp.org The tuner is also easily converted to operation on
other bands through a kit which I believe the NJ QRP Club is still has
available. Connection to the SW40+ is made through a short piece of coax
with BNC connectors on each end, which would be included. The tuner
automatically turns itself on when it sense RF and run hundreds of hours =
on
the included battery.

Depending on what is offered, either financially or in trade, I also have =
a
Vectronics keyer that has been built into a Radio Shack plastic enclosure
that conatains an internal speaker for code practice and is adjustable =
for
about 3wpm to about 30wpm. It is powered by a 9 volt battery.

I am 99% sure that I have manuals for all the above listed items and =
would
also provide them with the equipment.

If anyone is interested, please feel free to email me. Thanks and 73!

Jeff

I AM POSTING THIS MESSAGE TO THIS NEWSGROUP AS I SEE ROLAND GETER CONDUCTING BUSINESS ON THIS NEWSGROUP. IT IS MEANT AS A WARNING TO THOSE CONSIDERING DOING BUSINESS WITH ROLAND GETER, I AM NOT LOOKING FOR FLAMES, REPLIES, ADVICE, ETC...THANKS

Hello Everyone,

On August 26, 1998, I posted a warning message about doing business with Roland S. Geter, Sr., WB6LNA. Mr. Geter posted a "wanted" message on the newsgroups in late June, 1998 for laptop computers for a "law enforcement" project. I e-mailed him about a Toshiba Pentium notebook I had for sale that was not working and needed minor repair. I specifically explained to him what was wrong with the notebook, we agreed on a price and Roland Geter agreed to pay shipping. He requested Fed Ex C.O.D. shipping, since he "did a lot of business with the shipping depot in Phoenix Arizona" and things would go a lot easier. It cost me $132.58 in shipping and C.O.D. charges to ship the package.

I shipped the package as per his specifications and request and advised him of such. When the package arrived in Arizona, Roland Geter failed to pick up the package as requested by Federal Express several times. After several days the package was returned to me less my shipping charges I had already paid.

After that, I contacted Roland Geter several times by e-mail and phone to no avail. He always told me he was sending payment but never did. I finally took further action in late August, 1998. I posted the original warning message, contacted the proper authorities and filed a formal complaint with the Maricopa County Sheriffs' Office in Arizona. Roland Geter had stated to me he was a deputy with that sheriffs' office, (which later proved to be false).

After a lot of pressure from many on the newsgroups and the sheriffs' office, Roland Geter contacted me in late September, 1998, to call a "truce" and settle our dispute. I had received several e-mails from others who had been ripped off by Roland Geter so he agreed to pay me and then "square up" with the others. At that time I also agreed to stop the pressure from the newsgroups and the sheriffs' office.

To make a long story short, to this day I still have not received my money. I have tried to contact him several times a week to no avail. The others involved also have not received payment. I made the mistake of not doing a search on Deja News about Roland Geter, if I had, I would have found many others who ended up with the same fate as I did with my business dealings with Roland Geter.

I am posting this message to warn others of Roland Geter's bad dealings, i.e. bad checks, failed payments, bad trades, etc., that he has done to many, many others and myself. Do yourself a big favor, do not deal in any way with Roland S. Geter, Sr.

Piero

For Sale:

Complete Hallicrafters lineup consisting of HT-44 transmitter, SX-117 receiver, PS-150 power supply and all necessary interconnect cables for full transceive operation. All units work fine. Good output and audio reports from transmitter. Receiver is stable and sensitive. I would be glad to schedule a QSO on 20 or 75 for over-the-air checks. Original manuals are included.

I would like to sell as a set for $425.00 plus shipping. Would consider splitting up, if no takers on the complete set, so don't be afraid to ask.

This is a nice looking set and we've all seen the Ebay prices recently so here's a chance to get them at a more realistic price.

Ron, W0NYQ

August 11, 1999 is the day of the total eclipse -- a very important event this particular year, with the solar maximum so close. Radio Hobbiests are invited to observe the Audio Eclipse. Please visit http://hfradio.org for links and information about how you can participate.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

73 de NW7US, Tomas.

Heya,

```
I picked up a radio shack BTX-123 Business Band 2M radio... the manual =
says
the freq's are limited to 1511.225 to 156.250.  Its a Xtal controlled =
radio.

Would it be possible to add xtals for a 2M ham freq in this radio =
without
making any mods? or is there even a mod available??

Please e-mail the reply!  dylan@newsguyla.com
thanks

Hi,

I just bought this unit June 22nd, and received it July 14th and have
used the MVT9000 very little since the time of purchase, < 1 hour on it.
I have
just recently acquired an IC-R7000 base model and I never really had a
need
for a handheld, but it was great while it lasted. Including accessories:

OP-90 Case
MVT-7100 Antenna (It sure beats out the stock 9k antenna)
Radio Shack 20-006A
Universal Power Adapter
Box, manual, packaging (yes i kept it :)), original receipt, batteries,
belt clip, handstrap, 9k stock antenna, etc...

Please e-mail me a reasonable best offer, everything is mint, less than
an hour of use and no "shock" thanks from help from Rich on the polarity

part :).

Regards,

Aaron

Solar flux of 248 today, is record for this Cycle. K index at the moment of 1, A of 14 -- heck, the bands should be hopping today and tonight. Heard long paths fairly loud today. But, Aurora activity (level 4 and 5 today) is indicating some polar absorbtion.

I've added the aurora level report to the eAlert that I offer. The eAlert seems to be a popular service -- I have had a large number of new subscribers.

Do you wish to be alerted when Solar Flux, A index, or the K index figures change? Don't want to carry around a radio tuned to WWV, etc.?

I have a alpha-numeric pager that I can email. I know others have cell phones with the same feature. And yet others read email all day long.

So, I created an automated e-report with the WWV report. This email is only sent when one of the three figures change.

If you wish to subscribe to this e-report, visit http://hfradio.org, and go to the propagation center. There you will find a form that allows you to submit your email address to the list.

Also, I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

You got that right.
A 5 year old laptop is worth worth zip.
The 20 year old radios still have good value.

Greetings....

Anyone got a junker FL-2000 Linear or an FTDX series transceiver?
I have a broken top lid latch and am having a hard time finding a replacement This is one of the two latches that secures the top lid to the case. If you can part with one, please let me know.

Thanks for the bandwidth....

I have for sale a Yaesu FT-911 FM hand-held transceiver. This unit is
for transmitting on/in the 23cm band in ham radio . It is about one year
old & I am selling it because I hardly use it.
It is in mint condition . I kept the box and never sent in the
registration for it .
Heres what it comes with :
CSC-35 case -(for the FNB-17 battery)
CSC-37 case -(for the FNB-12 battery)
1ea.- Yaesu FNB-17 7.2V 600mAh compact battery (new never used)
2ea.- MAHA FNB-12 12V 600mAh Ni-MH batteries (used very little)
1ea.- NC-28B Yaesu battery charger for FNB-17 battery (new)
1ea.- NC-18B Yaesu battery charger for FNB-12 battery(good condition)
+ the FTS-17 CTCSS Subaudible Tone Squelch Unit is installed in it.
I am asking $475.00 + shipping for the whole thing . I'm located in So.
Calif. Please e-mail me directly .
Thank-You

FS 1C-551 6 Meter Multimode
USB, LSB, CW and AM
Mike & Power Cable

The operation is 100%, 12w out with good audio
and receives as well, the 551 is built like a tank
and is very forgiving. The cosmetics is about a 7-8/10.

Check this out, this is what a 551 looks like.

Greetings, all:

I need info on an old Kenwood TM-701A dual bander that I picked up recently. I don't have a manual, and would like to acquire one. Barring that, I'd like info on how to program a PL and save frequency and PL to memory. I don't even know if this rig had a PL encoder installed...was it an option? I can get a "CTCSS" line on the display, but have no clue as to what tone is transmitted or how to change it.

This rig also has the RC-10 remote controller (looks like a telephone handset) installed. I'd rather have a basic hand mic...anybody have one that will interface this radio?

I'm not very familiar with older Kenwood stuff, and ANYTHING I can find out will be greatly appreciated!

Thanks in advance!

73 de Dave KD7DS

Western Arizona

Hi
I have a question. Is the radio shack swr meter the digital one ?
thanks chris ni4l

A plan to setup a local amateur radio class didn't pan out, so the following equipment is for sale.

All items are in mint condidtion, with little if any use.
These items are located in San Diego, CA.

Yaesu FT-90 dual band mobile.
Includes box, manual, warranty registration card

$300.00

Yaesu VX-5R tri band (6M, 2M, 70CM) hand held.
Includes CSC-73 CASE, CD-15 DROP-IN RAPID LITHIUM-ION BATTERY CHARGER, box, manual, warranty registration card.

$275.00

Kenwood TH-G71 dual band (2M 70CM) hand held.
Includes case, DROP-IN QUICK CHARGER, box, manual, warranty registration card.

$175.00

Cushcraft A27010S dual band yagi.
Assembled and ready to go. Includes 100FT coax, tripod, mast.

$50.00

Bearcat 895XLT trunk tracker scanner
Includes box, manual, warranty registration card, external antenna.

$175.00

Astron RS-12A power supply
Includes box, warranty registration card.

$50.00

For sale, one ~1951 vintage US Navy R-366/TRR-5 general coverage receiver that covers .54 to 30 MHz in five bands. This radio was used for entertainment purposes and is truly a monumental piece of equipment. Weight is specified as 85 pounds and the cabinet is 14" high, 19 3/4" wide and 19 3/8" deep. The R-366 has 16 tubes with two RF amplifier stages, two IF stages, crystal filter, a four gang tuning capacitor, and push-pull audio output. All of the tubes with the exception of the rectifier are "minature" type (6BA6, 6AQ5, etc). I have owned it for about 20 years and I am thinning things out prior to a house move. The radio is nearly bone stock except for the addition of an antenna trimmer circuit and this is easily removable if you wish. Most of the original paper capacitors have been replaced and the radio works very well. The radio's front panel is very nice, there are scratches on the top and sides. I don't know what it's worth....it ain't no 51J-4, but it is not often seen....so I'll ask $175. Shipping is out of the question. I am located in the Detroit Mich area. On 12 Sept, this radio may be brought to the Findlay Ohio hamfest. Phone me at 313-382-2213 after 4PM EST , 313-317-2398 days, or reply to XYZ_p15218@flash.net but remove the XYZ_.

73,
Bob

There are a number of "secondary" functions that you access by holding the function button until you get a double beep. I can't recall all (as I just sold the radio), but here's a couple I remember.

F (1 sec) then VFO: Changes scan mode from 5-second pause on an active channel to pausing until activity ceases.

(I think) F (1 sec) then MR will skip the displayed memory during scan. (it puts a star or removes the decimal point...I can't recall which).

Also, there are three scan modes. When you are on a VHF (or UHF) memory channel, pressing the MR (or UP or DOWN on mic) for more than one second will start scanning THAT band. After starting scanning, press the BAND button and it will scan all memory channels on both bands. Another handy scan feature scans between one VHF and one UHF channel. Set the radio on the VHF memory (or VFO) frequency, then set it on the UHF frequency. Press and hold the BAND button for more than one second and it will scan between those two frequencies.

You can band scan by pressing and holding the VFO button until scan begins. Alternately, you can press and hold the UP or DOWN button on the mic when the radio is in VFO mode.

Note that scanning is rather slow.

The Duplex button allows you to listen on one band while transmitting on the other. I never found it too useful, but it can be used for cross band repeat (see below).

The radio can be modified for extended transmit (If not already done). Open the top (with speaker...I think) and you'll see a loop of green wire coming from the area of the front panel. Clip it to enable it.

THere is also a cross-band repeat feature that requires a mod. The mod (and the above one) is on QRZ.com.

Nice radio!! BTW: I seem to recall that it did have PL decode as well as encode. Could be wrong here!

email if you have any other questions.

Mark

I have three Motorola UHF Visars for sale. All are in nice condition, working correctly, with a Motorola Ultra High Capacity NiMH battery (model

NTN7394), antenna and detachable belt clip. One has the keypad option at $350; two are without keypad option at $325 each.

I also have an 'as new' 6 gang Visar charger, model NTN7621C for sale. Immaculate except for some scratches on the bottom plate. Works perfectly. I believe the new price is in the $750 range. $325 including UPS shipping within the US. Would also consider working out a trade for a BP/BR base station duplexer at 460MHz. and/or a 16 channel UHF GP300.

These PS really are quiet and it amazes me something so small will run at 20 amps on transmit with hardly a whimper.

Might look at home intercom systems. Mine is rather nice and you can
get them with Cassette and I think now CD.

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps, check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

73 from NW7US

P.S. R1AND - Antarctica, has been heard on the East Coast today. On 1833 KHz. WOW. And I see 50 is open (6 meters). Is this a sign of a hot season!?

Hope I meet you on the air. I hang out on 20, 15, and 10.

Not sure why there is such little response to my previous postings. I guess no one is in the buying mood or there is truly no interest in what I have to offer or they just don't like posts from DejaVu . Just in case of the latter, I am posting from my personal email account in hopes that I can get some response to my ad.

SWAP/TRADE/SELL in Dallas/Ft Worth area

Yaesu FT901DM - non WARC band HF Tranceiver

Excellent condition. Email me your offer and we might work a deal. This rig is too nice not to be used and I cannot bear to see it taking up my closet space.

Surely, there is a Novice looking for a first time rig. If this is the case, I can make a special deal for you as long as it can be verified that you are a newly licensed Novice. This radio is much nicer than what I started out 22+ years ago.

Maybe you need a backup radio? This would make a nice one. Has everything built-in, AC supply, keyer, AF bandpass filter.....

Not a bad radio for the asking price of $300. Or, trade for "?". Or make a resonable cash/swap offer. A photo can be emailed to you upon request.

7) Heathkit VF-1                               -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed
```

Items 6 & 7 above are "First Come, First Served". They where part of my original Novice station that I operated 22+ years ago. I rescued them from the previous owner who had left them in a shed and they have suffered exposure damage. I had plans to restore them, but just do not have the time. The Adventurer cabinet has some modifications that was done by the origianl builder (of whom I do not know). Not sure the cabinet is worth restoring.

Willing to discuss trades for:
1) QRP/Kit radios/accessories,but must be able to inspect trades "first hand" or via digital photo. Or, know the reputation of the builder. If still in kit form, I will consider trade "sight unseen".
2) CW Paddles - No Bencher Please.
3) Pentium Computer system with floppy/hard drives, SB card, CDROM, 32MB or more of memory. I do not need the monitor keyboard or mouse.
4) Desktop SW Band receivers. Later "Digital" models only please.
5) SW Band Active Antennas or SW Band tuners.
6) Bench 12V power supply. 20A or better.
7) VHF/UHF Allmode radio.
8) Yaesu FT90 Dualband radio - Yep, I know I'm dreaming.
9) Make me an offer, it can't hurt!

This unit is in cherry condition. I just sent it to the ICOM service center for a through checkout. They replaced a few item to bring it right into specs (dried out caps, mostly). It was working but I felt it needed a good run through.

This model has the Pass Band Tuning and Notch. I will include as many of the parts for computer attachment as I can find for free.

It has the very narrow CW filter option installed.

The case is not scratched. The display is completely clean and clear -- no scratches. There are no case markings or knobs markings worn in the slightest. Picture will be sent on request. I treasured this radio and took good care of it. I have the original box and manuals.

I would like to get $550 or better offer, shipped, insured anywhere in the U.S. (C.O.D. extra).

I will be moving soon and will be upgrading(?) to a transceiver for HF. Look for W5MDM on PSK31 really soon! I have been copying it with this receiver lately.

This is an excellent receiver for SWL or Amateur use. Ask around, it is well known and respected.

Fix the Spam Blocked email return address before replying. I HATE SPAM!!!!!!

Mike

Well, folks, now I am offering free web pages on the domain hfradio.org -- if
you need a place to hang your hat, please consider creating your homepage at
http://hfradio.org -- already have some taking up the offer... why not you?
Free, after all. No ugly watermark images floating about, or obnoxious banner

windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps, check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

73 from NW7US

P.S. R1AND - Antarctica, has been heard on the East Coast today. On 1833 KHz. WOW. And I see 50 is open (6 meters). Is this a sign of a hot season!?

Hope I meet you on the air. I hang out on 20, 15, and 10.

1) Sony ICF-SW100 w/acc., no box - $225 shipped FEDEX CONUS COD
    Discount for local pickup - $200
2) Johnson Viking Adventurer            -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed
3) Heathkit VF-1                               -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed

Will swap item 1 for QRP gear.

Items 2 & 3 above are "First Come, First Served". They where part of my
original Novice station that I operated 22+ years ago. I rescued them from
the previous owner who had left them in a shed and they have suffered
exposure damage. I had plans to restore them, but just do not have the time.
The Adventurer cabinet has some modifications that was done by the origianl
builder (of whom I do not know). Not sure the cabinet is worth restoring.

I would like to invite you to http://hfradio.org - my hobby website, where I am gathering radio resources together for the general public. My Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

(We just did field day as NW7US -- we had a LOT of fun up on a mountain at 3250 feet. Did all HF voice this particular time. And we're still camping out until after the 4th of July. Now, we're a mini-dxpedition! Hear us on the HF bands. We'll be working some 40 meters, but mostly, we'll be on 20, 15, 10 and 6. Hope to hear you!!)

73 de NW7US, Tomas.

I have two BRAND NEW in the box MIRAGE/KLM KP2/70CM mast mounted preamps,
432 MHz. Good for all of 430-450 MHz.
Two gain settings (10-15 DB, 20-25 DB, 0.6 DB NF independant of gain setting)
$110 each shipped.

I want to warn everyone that this man, Jim Bonner, is not to be trusted. He advertised a /\/\ VHF HT1000 and I sent him a postal money order the next day on 5/6/99. He told me once that he received the MO and was shipping the unit Friday, 2 weeks after I sent the MO. After a week, I emailed again. He said this time he would be sure to send it that day. I called and he gave me an excuse about an ill family member that kept him from sending it. He also assured me he would now send it and forward tracking numbers. He didn't. Finally I tried to call him and I guess he was on the phone and used call waiting and accidentally answered my call and said it would be shipped. He hasn't answered the phone since. Then I heard nothing for another week. Finally a month ago he emailed that the scan function had died on the radio and it had been in the shop the whole while and that the money would be sent back. I wrote him a week ago and said if I didn't see it in 7 days, I would do just this. A warning to the newsgroups. He goes by Bnn801@aol.com and jbonner@firefilms.com . I made every effort to let him return my money, instead he tries to pawn off some other radios I guess with no intent to return the money. I hope this embarrasses him and informs you. I know that when you sell over the internet, you take risks. This one bit me. I know not everyone is like him, but those that are do exist and don't care about what is right. I haven't completely given up either. There still is a way to get my money back through the Post Office fraudulent claim procedures. Then they go after him. As one last token to fix this, I offer to erase this message if I do receive my money from him. Until then, he may see this a few times. Jim, all I wanted was a fair deal. If you weren't going to send the radio, be man enough to send the money back, like you told me you would.

His address is

Jim Bonner
2740 E. Ann St
Philadelphia, PA 19134-5716

and phone numbers

215-634-3606 <----now disconnected
215-331-0300 Wk

And here is the email trail.....

First Sign of Trouble

I am looking for a transverter for either 6 or 2 meters.
Must be 28 MHZ if if you have a 6 meter then 10 watts out is
fine if it is a 2 meter I need at least 25 watts.

Thanks for reading.

```

I am looking for a cavity notch filter or plans for building a notch filter. I am not sure if a single notch filter would be tight enough. I am trying to notch out a undesired signal in band. I run a UHF repeater and I have a bad desense problem. I use a good bandpass notch duplexer and have added a DCI bandpass filter (the repeater is in a very high RF environment). I just found the source of my problems, in band. A near by amateur UHF packet station. I need to notch out this frequency that is only about 1.8 MHz away.

Any ideas???

Mike

FOR SALE:
WILL NOT SHIP - TOO HEAVY
DFW AREA ONLY

YAESU FT901DM (NON-WARC) $350
WITH:
Hand Mic - Yaesu (stock) no connector
Desk Mic - Shure 526T Series II
Original Manual - Good shape

Radio is in Very Good condition. The Shure Desk Mic is brand new, just installed it 2 weeks ago using the mic connector off the Hand Mic.

Selling the radio because I am going QRP/Homebrew and want to sell off my QRO equipment. I get more enjoyment from building and operating than using commercial equipment.

Willing to discuss trade for other QRP or Kit radios, CW paddles (no Bencher, please), Station accessories, or Pentium Computers. But, would rather sell outright for cash towards an Elecraft K2.

If you would like a full discription of the Yaesu FT901DM, please click the URL below and scroll down to the proper section:

http://www.qex.net/k7on/boats/foxtango.htm

The Pro-43 is "The Ultimate Scanner. This Pro-43 is in used condition. It
has a new keypad. It includes a copy of the owner's manual. I am also
including a book by Bill Cheek called "The Ultimate Scanner: Cheek 3!"This
scanner has been modified. This book shows you how to make modifications to
this scanner such as: Extended memory S-Meter Full 800 MHz restoration 54-88
MHz restoration Audio improvement Frequency Coverage: 30 - 50 MHz VHF-Lo
50 - 54 MHz 6 Meter Ham 54 - 88 MHz Restorable 118 - 136-975 MHz AM Aircraft
137 - 144 MHz Government 144 - 148 MHz 2 Meter Ham 148 - 174 MHz VHF-Hi
220 - 400 MHz Military Aircraft 400 - 450 MHz Government and 70 cm Ham 450 -
470 MHz UHF-Lo 470 - 512 MHz UHF-Hi 806 - 999.9875 MHz Features: Hyperscan
circuit scans at 25 channels per second, searches at 50 channels per second.
Direct keyboard access to 48,000 + frequencies. Auto-scan of 200 memory
channels. (Expandable) Electronic channel-lockouts. Lighted LCD Display.
2-second selectable scan delay. BNC jack for supplied flexible antenna or
mobile/base antenna. EEPROM memory backup. Crystal and ceramic filters cut
adjacent channel interference. Requires 6 "A"or rechargeable Ni-Cd batteries
or AC adapter.

FS: YAESU FT901DM $350
DFW AREA ONLY

YAESU FT901DM (NON-WARC) $350
WITH:
Hand Mic - Yaesu (stock) no connector
Desk Mic - Shure 526T Series II
Original Manual - Good shape

Radio is in Very Good condition (9 of 10). The Shure Desk Mic is brand
new, just installed it 2 weeks ago using the mic connector off the Hand
Mic.

Selling the radio because I am going QRP/Homebrew and want to sell off
my QRO equipment. I get more enjoyment from building and operating than
using commercial equipment.

Would rather sell outright for cash, but willing to discuss trade for
other QRP or Kit radios, CW paddles (no Bencher, please), or Station
accessories.

If you would like a full discription of the Yaesu FT901DM, please click
the URL below and scroll down to the proper section:

Several of us HAMs recorded what we could hear of the final transmissions from WNU and KFS today, of CW. This historic event is captured in four files from my site: http://hfradio.org -- the recordings are rough. I'm gathering other files from others... as time goes forward.

That's a shame; KFS was 599+ on 17.184.8 MHz here near Chicago. I didn't think to record them. I have a mini-disc player recorder handy, too.

Michael.

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only.

And, of course, you can create maps, check dx, propagation, and more, at the http://hfradio.org site.

I have a Vibroplex Brass Racer Iambic keyer paddle. Brass with wood
base.
Serial number 05708.

Would like to trade for Bencher ST model. Or will sell for $70 +
shipping.

I have a few Samlex 23 amp continuous (25 amp peak) switching 13.8 VDC power supply, only 3 pounds, very small and most important it is RF QUIET for HF (or VHF/UHF). Brand new in the box, three year manufacturers warranty.

$95 + $6 shipping each. Once these are gone, they're gone.

To the price police who suggest other sources, they do NOT have any for less and the current price from them is $119 + shipping, it was a special that has come and gone.

Ron,

Your equipment is for AUCTION, not for SALE and your subject prefix should be FA instead of FS. There are a lot of reasons for this and I'm sure there are a thousand readers out there who can explain them to you.

Cheers,
Rick

Hi All,

I recently bought a used Kenwood TS950SDX. I am missing a few items that one of you might have. I am missing the RM-1 Keypad. The recording & playback feature cannot be accessed without this (The DRU-2 was already installed). If you have one of these to sell, please E-mail me.

Also, in the accessory list on page 6 of the instruction manual, there are a few things listed that possibly one of you 950SDX owners could scan, and E-mail to me. They are:

Control location sticker
External control instruction manual
Menu key display list

Thanx & 73,

RON.....KA2IIA

X-MimeOLE: Produced By Microsoft MimeOLE V4.72.3110.3

I have a T-368 transmitter for sale.

Unit is in good cosmetic and electrical condition. Complete with extra mod deck. Speech amp and exciter included.

Transmitter is mounted on miltary rolling cradle that will go with the unit.

Has new power cable, and blower switch mod. Nice mid power AM transmitter, 4-400 in the final, modulated by a pair of 4-125A.

Bulletproof, mil-spec contruction designed for 24/7 service.

Runs off 120vac, RF power output 450-500 watts. Coverage from AM broadcast to 20MC.

$1250 for local pickup in Buffalo, NY.

Details on these transmitters can be found on my website.
http://www.buffnet.net/~bhowes/t-368.htm

Tnx

Now that my questions are answered (well most of them), I am looking for an Eddystone 830 - SW and an 850 - LW receiver. Please email with what you might have and what you are asking for it. I would like radios that are in working order and look good and correct. I would also be interested in a 770R in similar condition.

I am located in the Hudson Valley and am willing to drive several hundred miles for the right radios (including some parts of Canada). It gives me a chance to enjoy a day without work and avoid shipping a 50 pound radio.

Sorry for the crossposting but not everyone receives some of the newsgroups.

Thanks

M Bryant

The ham part of ULS which requests your e-mail address, the usual info, plus your SSN or TIN and YOUR PHONE NUMBER is due to start in August says lamb to the slaughter ARRL. FCC is out of control.

Let's ignore government abuses, because paranoid is the usual ignorant reponse of most morons.

A hacker can get your bank info if you use direct deposit for any government checks (like that Social Security all you retirees like), will have your e-mail to infect you wth e-mail viruses, etc.

Think it can't happen ?

If the FBI, State and Defense are being defaced once a week for a month, they'll steal your private data just as easily.

Why does FCC need your phone number, when they have your addrss ? That's absurd ! Furthermore, now your phone number and e-mail will be, without your say-so, public, if you want your license.

Try the online form; no phone number, no filing !

How about the thousands of old or disabled or low income people who will need to comply ? They won't have internet connections. What a way to thin out the technologically behind hams ! FCC says sign-up on paper; why ? if you can't derive any benefits to begin with ?

> HERE IT IS !!! CHOOSE YOUR UNLISTED PHONE NUMBER OR YOUR HAM LICENSE.
>
> In addition, all information provided in this form, except Taxpayer Identification Number, will be available for public inspection. If you do not provide the information we request on the form, the FCC may delay processing of your application or may return your application without action.

They say they have this right because they need the info to collect revenue. Where are the license fees then ? Most people don't have vanity calls ! There goes that rationale.

Plus, they need your phone number ? Why ? When the Coast Guard gets fake distres calls 9 times an hour because of the unlicensed service ? Why are we to be cataloged more closely than the life-or-death marine radio service ?

Plus, now for the first time in the history of the ARS, if someone doesn't like what you have to say, even an SWL, well, heck, they can just look you up and give you a PHONE CALL...

Howdy!

Just a friendly invitation to http://hfradio.org - where you will find
propagational resources, forcasts (K7VVV's forcast for Field Day, just in!),
and more. Create special fieldday maps!

Hope your weekend is successful!

My AEA Isoloop body broke (probably too many birds).  Anyway, does anyone
want the huge variable cap and metal loop band welded to it?
```

Shipping plus a small donation would be appreciated.

Not to burst your bubble but there is already a list established
sometime ago at T2@onelist.com

http://www.onelist.com/subscribe/T2

There is also edacs & edacsglobal on onelist as well.

I still have a few of the Samlex 1223 power supplies I got before the price increase.
I am willing to sell these BRAND NEW in the box (not refurbs!), 13.8 VDC @ 23AMPS continuous power supplies for $95 each + $6 shipping (48 state). I can ship anywhere in the world.
Only 3 lbs and RF QUIET for use on HF/VHF/UHF, whatever.

See http://radiodan.com/misc/samlex1223.htm

Hello , I have a VX-5 forsales. NEW CONDITION It's about 3 months old
a 9Dxxxxxx series ,and I have never had a problem with it.
It didn't do any hardware mods, I just use the Sofeware EVE to mods it. I'm
not use 6 meters at all since there has no 6M repeater.
and the main reason I selling it is I need the money for my school . It's
comes with radio,antenna, box ,manual , case(CSC-73), Rapid desk
charger(CD-15), Mic adapter(CT-44)and
the RS clip on belt clip. I don't want to give it up but
I need to pay by school for next year. I'm asking $349 + shipping.Thanks
you!! Victor iden1000@hotmail.com

1 1/2 year old Icom Icom 756 HF and 6 meter transceiver. With internal antenna tuner. Has the optional voice module installed.

MARS/CAP mods professionally done.

Unit is like new, with no scratches or damage. Functions 100% like new rig.
Complete with all paperwork, manuals, and original box.

Reason for selling, I do mostly AM activity on older boatanchor gear.
Located in Buffalo, NY, you can stop by for inspection if desired.

Will professionally pack and ship anywhere in the United States.

$1600.00 + UPS shipping to your postal code.

Image and specs of transceiver on the Icom site
http://www.icomamerica.com/amateur/hf/IC-756.html

Any questions just email.

Tnx

Kenwood TH28A 2 Meter HT

Transmit 144-148 MHZ
Receive 136-173 MHZ

This unit is also dual band receive - It receive the 440 band and may be used as a crossband repeater - receive on 440 and transmit on 2 Meters.

Have HT, battery pack, wall charger, alkaline battery case, 12 volt power cord, manual and original box.

The unit has a flexible antenna, not the original solid rubber duck. The antenna works great with the unit.

$125.00 shipped.

Butch kd3yt@penn.com

Get on 10M and have lots of fun! Use you Kenwood 641/642/741/742 radio. This module fits inside as the "third" band.
Model UT-28S.
Sunspots are still on the rise and you will have terrific propagation on 10M for at least the next 4 years!

I have two of these BRAND NEW in the box! Never used or installed.

$225 each or both for $400 + ship.
Credit cards OK!

You told me to check back with you later on the speaker. I still could
give $ 100.00 shipped to Little Rock, AR

I have the following gear for sale.  Purchased from a business that is
no longer using it.  Will consider offers starting at $200, shipping
extra (Orange County, California).
```

2 HT90 (NHN6326A), Jun 83/Jan 85
1 HT440 (NHN6325A) Jun 84
2 Mobile Microphones (HMN1017A)
3 HT Desk Chargers (NLN7493A)
2 HT Holsters
1 Mobile Speaker
1 Desk Microphone (HMN1027A)
2 Mobile Radios Maxar 50 (one Model D24JAA6000A, other larger, can not read label)
1 Power Supply for Base Station (HPN1004A) 14.2vdc
2 Mobile Mounting Brackets (HLN4609A)
Mobile antenna and coax with mount

Currently the HTs are set (crystalled) for TX 466.450 and RX 461.450. Presumably the mobile units are the same.

Contact via email: hlassiter@usa.net

Does anyone know where I can find dust covers for my gear ??? Most of the amateur dealers used to carry covers by a company called "Cover Craft', but none of them carry covers any more.

Thanks,

RON.....KA2IIA

HF Antenna Tuner, very heavy duty

Click here for link ->
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=115299903

Antenna Tuner (Transmatch)

HF Antenna Tuner. Homebrew, but better than commercial quality. Built with broadcast transmitter parts. Vacuum variable caps, and large roller inductor. Unit is housed in black instrument case, about 19" wide and 12" in depth.
Range: Covers 160-10 meters, will match a very wide range of loads. Tuning is not limited to the amateur frequencies as inductor and caps are not fixed, continuously variable.

Features: Turns counters on both vacuum variable capacitors, using the tuning/loading mechanism of a T-368 transmitter. Roller inductor, also with turns counter, is operated by motor with gearbox, using front panel momentary contact switches. Indicator light shows motor operation. Tuner can be bypassed via relay using front panel switch. Indicator shows tuner in/out condition. Front panel Power meter shows both forward and reflected power using internal bridge unit. Meter range is adjustable using front panel mounted potentiometer. Unit runs off 110vac, and is supplied with 3-wire line cord. Front panel is low gloss black with white control lettering.

Construction: QRO away! RF connections are mounted on the rear bulkhead using SO-239 jacks. Builder of the unit claims power handing capability of 5000 watts, and looking at the construction of the unit, liberal use of heavy strapping and broadcast quality components, I believe it. This unit makes the MFJ, Palstar and Nye tuners look like QRP.

Use: Was used with my T-368 for over 1 year, working flawlessly. I have seen many antenna tuners, amateur, commercial and military, and none have the heavy-duty constitution of this unit.

Any questions, just email!

Tnx

You go to the local fabric store and buy a remnant for $1.  A few snips with
a pair of scissors and short time on the sewing machine and it's done.....
and they all color coordinate with your shack.

YES, I do it myself!  The XYL's too busy working to feed me.

Is there anyone out there who could make a copy of their Kenwood
```

950SDX schematic for me ??? I will gladly pay any duplicating &
postage costs involved. I just bought a used 950, and the schematic
evidently is not part of the instruction manual, but is separate. If
you have a scanner, you could scan it as a gif, and E-mail it to me if
it is easier to do that. Also, any operating tips ??? The instruction
manual is quite complex---maybe one of you have some good tips.

Thanks in advance,

RON....KA2IIA

Kenwood TM-V7A in excellent condition. Comes with DFK-4C Front Panel Kit.
Not sure if I can find the box and the mobile bracket which is in the box.
If I can find it, I'll mail it to you later.
Asking $350 without box and mobile bracket.
Buyer pays shipping.
Please e-mail for more info.
Thanks
Chad

Thinking About Selling My Stock NRD-515.
Anybody out there need one of these?
Mine is in perfect working order. Looks excelent.
With BOX and Manual.
Any offers? Now before I get flamed for not putting a price... I have NO idea what this radio is worth. I am really putting this out there to see if there is any interest. If there is interest then market forces will prevail.

Thanks for taking the time to read this.

(3) Model 432 VHF/UHF Highpass filter for TV and Cable with 10M trap. - $15 ea.
(1) Model 461 Stereo speaker RF filter for HF - $20
(1) Model 472 High pass filter for cable and TV with power line filter providing 84dB
attenuation of RF below 50 MHz - $25
(1) Model TV-300-HP by RL Drake , attenuates below 50 MHz for TV - $10

Add shipping to prices. All are new in original packaging. The ICE filters are
really high quality in aluminum housings. The Drake filter is still in the original
bubble pack.

regards,
Chuck...K1KW

Hello,
I have for trade a MFJ 1278 Multi-mode TNC with multi gray level modem.
Includes all the cables Manuals and software. The software is Multicom
MFJ1289 modes are :
pactor
HF packet
VHF Packet
RTTY
ASCII
FAX/Color Fax
CW
Amtor
Navtex and color slow scan
This is a great TNC for these modes also has mail box cw mem keyer and more!
I would like to trade this for some Kenwood ts-520s assecories Iam
looking for a Kenwood DG-5 Digital display. Or send me a email with what you
have to offer to kb9hgi@qsl.net Thanks!!!

Hello Everyone,

I just wanted to drop a few names of some guys I have dealt with over the past few months who have been a real pleasure to deal with. The deal went through smoothly with lots of communication between parties and the parties involved were real gentlemen. I have dealt with these guys on the newsgroups and/or the For Sale/Swap mailing list at forsale-swap@qth.net.

These GOOD GUYS are:

W2KL - Louis Bocchetti
KA1SRD - Edward Rauer
KD1UX - Glenn Pike
KJ5NO - Brian Horst
KF2GG - Richard Schneider
N2KXX - Kevin Francis
N9KHI - Marc Mallett
W2TGP - Clifford Priebe
(call unknown) - Tony from Tony's Equipment

Thanks guys, it was a pleasure doing business with you.

73, Piero - N3FVG

I have for sale a ICOM W32A Dual band HT with the following accessories:

Speaker mic

Extra battery (NiMH)
Computer interface cable w/software
Carry case

The radio is in perfect condition used only a couple times out of the protective case. I have the original box, manual and recipt.
I am asking 250.00 OBO for the package (split shipping)

This radio is really in great condition............

Thanks

```

I have a good condition and working Motorola Max Trac 100 mobile radio in the 42-50 MHz range. 2 channels.
Model # D51MJA93A5AK WITH serial number perfectly readable. Presently on 48.5 MHz, receive is <.2uv.
It measures 80 watts out on my service monitor.
With mounting bracket, short power cable, mic

$225 shipped to lower 48. I know this is a rare radio in the 42-50 MHz range, so first e-mail or call at 310 821-5244 (call only between 9AM-9PM PDT) gets it

I do NOT have software and CANNOT program for you. I do not know if it will go outside of the specified 42-50 MHz range. YOU determine suitability yourself before you buy.

Looking for an IC-706 MKII with DSP or the IC-706 MKIIG

Must be a full or partial trade for something from my site.

Take a peek at www.radiodan.com and www.radiodan.com/hamindex.htm
Need something I don't have on my site? Maybe I've got it or can get it.

I have TWO UT-28 modules that are NEW in BOX.
These will get you on 10M from your car with your Kenwood 742 or 642 triband radio.
Get one for you and one for a buddy and have a contest to see who works more on 10M on your drive home!
$225 each + ship or $400 for both + ship.

Credit cards OK

Hello,
Anyone have the new log-eqf v 9 yet? I was looking for a copy to try out but
it was not at log-eqf site yet. Also I have version does anyone have the
modules
for DXCC WAS and WAZ for version 8. I would like to check this out also.
Thanks!!

Steve,

For $49.95, you can check out version 9 all you want and you will not have to copy anyone registered disks.

I got version 9 at Dayton and like Tom's earlier versions, Version 9 is works great!

I have one 440-450 MHz module for the Yaesu 726.

$150 + ship.

Version 9 is not out as shareware (as I understand it). DXCC, WAS and WAZ are modules of the registered version only. Buy it, you'll like it!

I have Version 8 and have been asking for some of the things in 9 ever since
I got it. I looked at the ad and am singularly unimpressed. It is still a
dos program and still has no variable length or user configurable fields.

My opinion is

For contest use NOTHING beats Troll
For General Logging NOTHING beats Logic 5.

For me, that is what I will stick with.

I have at ebay a new ICOM MT-100 tuner which fits the styling of older ICOM
radios. It can be used with ANY brand or type of radio.
See it at http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=108860492

Last 12 hours!

I have the new version 9. of Log-EQF. Best logging program I have ever used.
To get a complete working version only costs 35.00 and the complete Rig-EQF is
only 20.00. Well worth the really low price. Not fair to steal a man's
creation from him.

Looking for at least a B model or better (second from last digit in model #
on back of radio). Would prefer with keypad model, but clean model may be
acceptable. Will either pay with cash or trade.

I have been chosen by my Radio Club (WARC) to buy our next new HF radio for
the club station at the WLA Veterans Administration Red Cross site.

I can spend $750 for a good used TS-570.

I MAY consider other late model HF radios. MUST have a radio that runs on 12
VDC, built in antenna tuner, less than 5 years old.
I know what a good deal is, no need to offer a TS-440 for $800!

We're in no hurry...........

Last 10 hours on ebay for the excellent condition 2K Classic X 80-10M amplifier.
VERY heavy duty power supply and RF deck. Using a pair of 3-500 tubes, it is THE strongest amplifier using these tubes.

I have a nice Kenwood TS850SAT that I traded for from Murray on
rec.radio.swap. I have it listed for $975.00 plus shipping but I will
sell it to you for your radio club for $875.00 and I will pay shipping
to you. I will even take one of your SP-8 speakers that matches my 920
in trade.
I have the box, book, mike and dc cord. It is a 9+ . But it is probly
over 5 years old. I did not see that in your email till I had already
typed down to here. :-)
Catch ya later

> Thanks!!

I'm kinda partial to the VX5-R. I bought one a couple of weeks ago and cannot put it down. The small size and the 5 watt output were big sellers for me. I'm burnt out on packet, so that wasn't an issue. I also like the ability to program the radio as I like it using either ADMS or EVE software. It does a good job even on AM broadcast and the SW bands with a good antenna. It is am amazing little radio given its' size.

Dan

I have a BRAND NEW Eimac 5CX1500A

Stored at HENRY RADIO. Tube has been tested and works perfectly.
While it has been plugged in and tested, it has ZERO hours on it.
Ted Henry will verify this.

$295 + ship

Pay with credit card and be safe. Guaranteeed good tube with full output.

Which direction do the radios face when all 6 are plugged in? If they face forward how long is the charger? If they stack like dominos, what is the length and width?

Philip Barber wrote:

> Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe this is the current revision; it has a production date of July 1997. In as new condition except for a few scrapes on the bottom. Tested, and is working perfectly. New cost is somewhere in the $700 range.

It is a freeware package for the VX5. It seems like a good program, but

I haven't had a chance to use it much.

The URL is http://www.geol.com/vx5/

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.
RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched for 200-260
VAC
50/60 Hz.
Available while I still have a few left at this price (less than dealer
cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

513A "Q" standard, 249uH, in the felt lined Boonton mahogony box
with application instructions. Looks excellent, almost new. $20

4 standard inductors, Model 103A for the following frequency ranges:
.8 to 2 MC - 100uH
1.5 to 4.5 MC - 25 uH
5 to 14 MC - 2.5 uH
20 to 35 MC - .5 uH
$10 each

3 older style standard inductors, silver plated cases
50 to 150KC - 22.5 mH
4.8 to 17.5MC - 2.44 uH
14.2 to 50 MC - .28 uH
$5 each

$70 shipped for all of them. If you want less, then indicated price
plus shipping.

regards,
Chuck...

Small town Volunteer Fire and EMS looking for a VHF repeater. Old communications tower moved further away forcing us to look for solutions. As our budget is small to none, any donations of equipment would be appreciated and subject to tax write off. All other offers are welcome.
Thanks.

I have a BRAND NEW in BOX ICOM MT-100 antenna tuner.
Has dual meters for forward and reverse power.
Very rare, I can't think of when I've ever seen one of these available before.
Low opening bid, NO RESERVE!
Matches older ICOM gear

See http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=108860492

Guys, guys, guys, simply look on the back cover of the HRO catalog. OR
better yet, go to www.search.com or www.altavista.com and type in FT90.
I found several places that show a picture of this new radio. I find it hard
to believe that you haven't tried a search engine yet...

Dan

FREE! FREE! FREE! FREE! FREE!

The Cuyahoga Amateur Radio Society is offering a free service to the ham radio community to post no-fee items for auction. Auctions can last from 1 to 14 days, can contain reserve prices, and will automatically extend the auction for 5 minutes after the last bid. Posting is FREE!

We also are offering a free classified ad service. Again, posting is free to the ham radio community. Advertisiments to the classifieds do not expire, however, if you sell your item, it would be appreciated if you delete the ad.

The ONLY restriction is that items must be of general interrest to the ham radio community.

These services are NEW as of now, so there is little posted. Please post and tell others about it!

Find the auction at http://www.cars.org/auction

Find the classifieds at http://www.cars.org/classifieds

The Swan 350's, no doubt one of Swan's most popular series of transceivers. I bought this radio because it was sold together with a Swan 500. I've decided to keep the 500 for my father and sell this 350.

Comes with a Swan hand mike, Swan 117 power supply, manual (copy) and an external Realistic speaker.

I have fired it up and have made contacts with it on SSB. My watt meter shows in excess of 200 peak watts output on SSB.

MFJ1270C TNC - This tnc was bought for a packet node and was never
used. Has been on air about 15 minutes. Manual included $75.00 shipped.

MFJ1278 Multimode TNC- I used this tnc on my home packet station for
aprrox 7 years. Does have scratches on top cover where radio sat.
Manual included. This model does not include pactor mode. $100.00
shipped.

I have a SX-100 with all but one of the main tuning
knobs original. Generally works fine, though the BFO
is a little iffy. Tuning mechanics are fine.

The calibrator case has been replaced with a new box
and the stem of the pitch control has been broken and a
piece welded on and a brass coupling added to which the
knob attaches. (looks OK but a little wobbly -- needs some
adjustment)

The cabinet is a mess. Two corners have suffered serious
denting and sloppy patching, another corner has bad chipping.
The top half of the front panel was repainted a non-original
sorta-close color and the surface was not well prepared.
The cover is intact but was painted a too-glossy sorta-close
silver.

The receiver looks fine from a distance (other than the obvious
non-original knob ... as you get closer the flaws begin to show.
(No, I didn't do any of the damage or any of the repairs.)

I have $70. in this (long story) and will sell it as a parts or
restoration rig or trade it for a Multi-Elmac PMR-7 in good
shape with a 6m converter (perhaps an old Ameco).
Note: I am looking for a compact boatanchor receiver
to match my Gonset Commander (160-6m AM/CW).

Thanks! & 73, DavidC K1YP@qsl.net or 603-894-1174

If I was in the market for an SX-100, DavidC, I'd be happy to buy
from an honest guy such as yourself who doesn't describe his gear
as being in "Rare, Mint Condition" (when it really ain't)! :)

73, and hope your SX-100 finds a new home soon,

-bill

I have two KaGOLD software for the Kantronics TNCs. For PC computers WIN 95/98, 3.xx, DOS, OS/2, (NO MAC!).
This is absolutely THE best software for all digital modes. I use this software myself on the KAM TNC.
AMTOR, PACTOR, G-TOR, RTTY, CW. Single port or full dual port support.
This is the version WITH PACTOR.
Too many features to list them all here.
Version 9. NEW, you are the first owner and user and you use the registration card. SEALED box.
Normally $99.95 + ship.

$68 DELIVERED price each.
I have two available.
Note: I also have one PkGOLD, same as above but for AEA TNCs, also $75 delivered.

I have an HDR300 Hy-Gain rotor that was up and not turned for a few years.
It is complete and looks nice inside. The control box looks very nice.
I did have to hacksaw the bracket on the shaft of the rotor partially to remove the plate. The same bracket can be used as little damage was done to it.
I have NOT plugged this in to see if it works.
I am selling this as-is but probably all Ok. It was used VERY little. this was the rotor up at HENRY Radio store in West LA and not turned often.
This was the KING of rotors just a few years ago (over $1000).
$175 for the both rotor and control box. Plus shipping.
Credit cards OK

Hi Gang,

I've acquired an unbuilt IM-18 and am looking for a copy of the manual.
Will pay for postage and cost of copying if you have one.

Im looking to set up a 1940's-50's era station for some kids to allow them

the use of some older equipment in order to familiarize them with newer technology.
Must be in pretty good "working" shape. Please, nothing thats been dropped out of a B-52 at 50K feet.

Any contributions would also be appreciated.

Please email me at paulvanasse@tp.net

Thanks and 73's de W1PEV

I see, Tony. Techamericas website it pretty nice, but the search engine for finding anything is poor at best. They do have the DJ-C5. Here's how to find it: Go to techamerica.com. From their homepage, click on "online catalog". The screen you get next will be a tab labeled "Online Catalog". Page down this tab to catagories and click on "communications". The next screen will also have alist of catagories, click on "amateur radio". Next screen: click "transceivers-handheld"
The first items listed are Standard radios. Page down to the 12th item..."2m/440mhz credit card HT"...this is the Alinco DJ-C5T. They

```
have it for $159.95. Cheers,

Bought used last year, cleaned the traps and elements, but never did put it together. (Decided it would dwarf my little crackerbox Cape...) Appears to be in good shape - elements straight, etc., with manual.
Boxed for shipping (but it's heavy).

$175 pick-up or will deliver within 50 miles of Providence, RI.

$225 shipped CONUS.

Tnx and 73
Gil

I am in need of an rlc-2A for my UHF repeater if you have one that you
want to move to upgrade to something else please E-mail. I need at
least the controler and rack mount cabinent. if you have the auto-patch
option I would be interested but its not a must. dont need DVR stuff.
I have the firmware update for the unit. just send E-mail as to what
you have and we can go from there.

10M is OPEN! Get in on the fun and work DX from your car!

Enjoy 10M FM on your Kenwood 742 or 642. UT-28 module for 742/642. Very easy to install in your radio. Only a small 10M antenna (can use a converted CB antenna) needed.

BRAND NEW in the box. A rare find. Not available from the factory any longer.

I have TWO of these (one for you and one for a buddy?).

$250 EACH or both for $450 + ship.

Credit cards OK
e-mail or 800 995-2929

Great condition, works quite well. (5 foot wire brings in all the big'ns and quite a bit of small'ns as well. The AVC still works, and the BFO is nice & clean.)

This radio is quite collectable, very cool looking, esp. at night when dial scale is lit up. Both dials are still in good shape. The silkscreen dial scale is in good condition, and is surprisingly accurate when calibrated to WWV.

Will sell for $125 and I will split the shipping, which in the CONUS should be around $20-30. (hence the term 'boatanchors'.)

e-mail for further info.

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.
RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched at 200-260 VAC 50/60 Hz.
Available for a limited time at this price (less than dealer cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.
RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched at 200-260 VAC
50/60 Hz.
Available for a limited time at this price (less than dealer cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

The Techamerica price is $119.95 + shipping.

```
They are NOT available from any place that I know of for less than $119.95.

These are really great power supplies at a terrific price!
Radiodan price is $95  + $6 shipping. NEW IN BOX with 3 year mfrs warranty.

Techamerica price is $119.95!!

Call them and see!

My Price is very fair at $95 for the 23AMP Samlex power supply (3 pounds, very small).

I see many "price police" out here with incorrect info.

Yes, I do think you price is fair! HRO is a little better. I for one am glad their is a "price police" out their provided they are correct. If I am buying it helps me to make an informed purchase. If I am selling it keeps me honest and fair.

So to all those "price police" thanks!!!!! Keep up the good work!

Darn...I am working on a "Programming the GP-68" Web page, but I sure never considered SELLING the information to anyone.

Well, the manuals DO come with schematics.

See "Programming the Motorola(tm) GP-68" at:

http://www.clintbradford.com

and choose my Amateur radio site.

Although I have no preference of the two radios you listed, they both will work for packet radio, at least at speeds of 1200bps.

Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe this is the current revision; it has a production date of July 1997. In as new condition except for a few scrapes on the bottom. Tested, and is working perfectly. New cost is somewhere in the $700 range.

$350 including shipping UPS CONUS.

I have several available.

Both UHF and VHF to choose from. They are all very clean, and power up and receive nicely.

Package includes radio, power cord, microphone, and mounting bracket.

These radios are two channels with PL installed. One channel is active - the other is empty. Currently in the 151 Mhz area for VHF, and 453 area for the UHF.

$25.00 per VHF radio, and $35.00 per UHF radio - Plus $10.00 USPS Priority Mail shipping - shipping discount for multiple radio purchases.

If you have any interest in these radios - please let me know
ASAP.

Thanks for your time...

I'm looking for an Azden PCS-2000 mobile 2M radio in good working condition. If you have one you'd like to let go, plase drop me a line. My 68 year old mother-in-law (who is licensed) is having great trouble learning how to use a new Kenwood with all of its bells and whistles, and her Azden has bitten the dust.

If you can help us out, let me know -

Todd Ellis, N2XL

I just bought a Yaesu FT100 from AES.
First impression of the radio was good. Works great on HF (40M and 75M)
I entered some local repeater frequencies and scanned for awhile. When the radio stopped on a couple of repeaters, I noticed that the signal strength was less than half of what I had gotten on other radios hooked up to the same antenna (Comet dual band ground plane @ 70" on top of tower).
Repeaters that normally were full scale are now S-9 on the FT100. I looked all through the menu to see if I had some attenuation on but there is no way to attenuate the receiver on 2M. I also read all through the manual, but did not find anything on changing the sensitivity of the receiver on VHF. The receiver on VHF and UHF is very dead. My wife was about 200 yards down the street in her mobile (50 Watts) and I was only getting 40 over S-9, the signal should have been FULL SCALE and then some.

Has anyone else experienced this problem wit the FT100's receiver ?
I plan on calling Yaesu tomorrow about the dead receive on the radio.

Thanks in advance,

Jim N5JIM

Tim, you're way out of line. First you spam this message to every radio newsgroup under the sun (I suggest you read up on newsgroup etiquette for newbies) and then you insult everyone in the newsgroup rec...antenna

And why would anyone want to exchange emails directly with you anyway if you're such a clod?

Yes, you have a great day down under mate.

Tim wrote in message <371A8C2B.2E374305@omen.net.au>...

I'd like to trade my 1965 Cobra Cam 88 tube type, 24 channels. (One of the few early units that came with an extra channel).

Recently gone over electronically, although the chassis is a bit gooey and needs a good cleaning.   Will go base or mobile with included power cords and mounting brackets. Has original hand held microphone, but sounds great with a
TUG8-D104.   The channel knob is not original, but you'd
never know it if I hadn't told you. (blends in real well with the scheme).
A few minor blemishes in the brushed aluminum face. Also the S-Meter is a replacement....
It is exactly the same size as the original, but it is black face rather than white face. Has fine tune, squelch, PA/CB, and "Dyna-Boost", (or speech
compression).

I'd like to trade for a nice chrome Vibroplex paddle or similar.   I'll entertain all ideas, including swapping for a repair job on my Hallicrafters
SX-24. It needs the four section electrolytic cap in the power supply replaced, and possibly a new choke which I think is what took out the cap to begin with. I have a schematic to go with it, but I'm not talented enough to fix it.

Please email Cary at cfries@tic.bisman.com.

Regards,

Cary Fries

Not sure why this is on the "swap" grp, but I was surprised at the good sensitivity on 2M with my FT-100. I'm getting clear reception on repeaters that are usually scratchy sounding. Don't have 440 ant. to try but County

EMS (450.xxx) comes in just like scanner using 2m ant. HF works great too.
DSP is very impressive, now if I only had smaller fingers or the FT-100 had
bigger buttons it would make a nice base rig (which is what I am using it
for.)

I am looking for very resonable 1200 mhz equipment. I need radios and
repeaters. Also interested in mono band radios.

Please respond via email.

Do you think that the S meter reading is more not accurate on uhf/vhf and
the radio still has fantastic
sensitivity?
If you inject a calibrated signal into the antenna port and do a 12db sinad
test, then I we could put more
faith in these comments.
How about at least having someone driving out to the fringe signal areas
and compare which radio has the best
ability to pull the signal out of the noise floor?
I have never felt any of my VHF/UHF radios had more than a relative signal
strength meter.
The Quality of the directional couplers and RSSI calibrations are more in
question to me.
Let me know your thoughts Joe?
I enjoy the intent of finding all the faults in the FT-100.
I see Yeasu has been responsive in complaints, and aims to please so far.
I think it is keeping it's head above the water quite well so far.
I will wait out another month or so before I purchase.

The reason I posted this on this newsgroup is because this newsgroup is read by a large group of hams each day, and I thought that I would have a better chance of maybe finding what was going on with the FT100 that I bought. I am so sorry for any inconvenience that this post may have caused you. I am glad to hear that you are not having any problems with your FT100. It is so funny when I see responses to posts about problems that people are having with their radio. Some people take it personally when they read about defects pertaining to a radio that they have. They act like you are talking about their child or something.

The fact remains that I have a serious problem with the receiver on the FT100 that I purchased. I have received many emails from FT100 owners, and none have had this problem. The dead receiver on VHF and UHF does not seem to be a defect with other FT100s. If not for the receiver problem, the FT100 seems to be a neat little radio. I am shipping it back today to get the problem taken care of.
